I WOULD BE INTERESTED IN LIVE WEBINAR FOR THIS COURSE □ YES □ NO

7 Hours of Continuing Education Per Day

Webinar System Requirements:
Mac or PC:
Operating Software Windows XP with SP3+, Vista with SP1+, Windows 7 – 10
Web Browser Mac: Safari5+, Firefox, Chrome
iOS 7.0 or later
Android 4.0.x (Ice Cream Sandwich) or later,
Single Core 1Ghz or Higher, 2GB or more of RAM; Microphone
3G connection or better (WiFi recommended for VoIP audio)

iOS: Safari5+, Chrome
Android: Webkit (default), Chrome

Webinar Registration:
Join from Android:
Operating Software Android 4.0.x (Ice Cream Sandwich) or later,
Kindle Fire HD
Internet connection 3G connection or better (WiFi recommended for VoIP audio)
Browser for Web Start Android: Webkit (default), Chrome
Hardware Any 1 Ghz single core processor or better (non-Intel),
Microphone and speakers (headset recommended)**

Join from iOS:
Operating Software iOS 7.0 or later
Device iPhone 4s or later; iPad 2 or later
Internet connection 3G connection or better (WiFiI recommended for VoIP audio)
Browser for Web Start iOS- Safari5+, Chrome
Hardware Any 1 Ghz single core processor or better (non-Intel),
Microphone and speakers (headset recommended)**

Join meeting from any device:
Open the link in the email provided by USC Continuing Education. If a link is not provided go to http://zoom.us and enter the 9, 10, or 11 digit meeting number to gain access to the webinar. Download and run the application if applicable.

Technical Support Onsite:
Call our continuing education office at +1-213-821-2127, email cedental@usc.edu, OR type in the chatbox provided by Zoom.

Registration Fees
Before December 1, 2017
Day 1 - Dentist: $400
Day 2 - Dentist: $400
Both Days - Dentist: $695
Day 1 - Webinar: $400
Day 2 - Webinar: $400
Both Days - Webinar: $695

After December 1, 2017
Day 1 - Dentist: $475
Day 2 - Dentist: $475
Both Days - Dentist: $795
Day 1 - Webinar: $475
Day 2 - Webinar: $475
Both Days - Webinar: $795

Special Daily Rate for USC Pediatric Dental Alumni: $325/day

7 Hours of Continuing Education Per Day

Fees include course material, continental breakfast, and refreshments during breaks.

Refunds are granted only if a written cancellation notice is received at least 14 days before the course. 50% of the tuition minus processing fee will be refunded if a cancellation occurs within 7 days before this course. No refund is granted after that. A 25% fee is withheld for processing. For additional registrations, verify this form and send.

Upcoming Events

TEMPOROMANDIBULAR DISORDERS: FROM CAPSULITIS TO ARTHRITIS (LIVE WEBINAR AVAILABLE)
Friday, January 19, 2018

THE 43RD ANNUAL USC INTERNATIONAL PERIODONTAL AND IMPLANT SYMPOSIUM
Cadaver Workshop (Rasperini): Wednesday, January 24, 2018
Cadaver Workshop (Hurzeler): Thursday, January 25, 2018
General Sessions: Friday - Saturday, January 26 - 27, 2018
Hands-On Workshop (Chen): Friday, January 26, 2018
Hands-On Workshop (Rojas): Friday, January 26, 2018
Hands-On Workshop (Tabenalla): Saturday, January 27, 2018
Dental Hygiene Forum: Saturday, January 27, 2018
Dental Hygiene Hands-On: Saturday, January 27, 2018
Cadaver Workshop (Mazor): Sunday, January 28, 2018

LEARNING IMPLANT DENTISTRY FOR THE RESTORATIVE DENTIST
Part I: Saturday, February 3, 2018
Part II: Saturday, April 7, 2018

Webinar System Requirements:
Mac or PC:
Operating Software Windows XP with SP3+, Vista with SP1+, Windows 7 – 10
Web Browser Mac: Safari5+, Firefox, Chrome
Internet connection 1:1 video calling: 600kbps (down) for HQ video and 1.2 Mbps (down) for HD video (broadband recommended)
Software Zoom desktop app, Invitrocast enabled
Hardware Single Core 1Ghz or Higher, 2GB or more of RAM, Microphone and speakers (USB headset recommended**), Webcam (to use HDFaces)

Join from iOS:
Operating Software iOS 7.0 or later
Device iPhone 4s or later; iPad 2 or later
Internet connection 3G connection or better (WiFi recommended for VoIP audio)
Browser for Web Start iOS- Safari5+, Chrome
Hardware Any 1 Ghz single core processor or better (non-Intel),
Microphone and speakers (headset recommended)**

Join from Android:
Operating Software Android 4.0.x (Ice Cream Sandwich) or later,
Kindle Fire HD

Continuing Professional Education

Recertification Program
Adult and Pediatric Oral Conscious Sedation Recertification Program
Adult Oral Conscious Sedation: Saturday, January 20, 2018
Pediatric Oral Conscious Sedation: Sunday, January 21, 2018
9:00 a.m.- 5:00 p.m.

In Person Lecture / Live Webinar Available
James Tom, DDS, MS
(Course Director)
Dr. Tom is Clinical Associate Professor at the Herman Ostrow School of Dentistry of USC, Division of Endodontics, Orthodontics, and General Practice Residency. He is President-Elect of the American Society of Dentist Anesthesiologists (ASDA) and has served as their Program Director for various continuing education courses. Recently he completed his appointment as the post-doctoral dental anesthesiology education representative for the Commission on Dental Accreditation (CODA) and has served as faculty for the ADA’s simulation-based course on the Recognition and Management of Complications During Minimal and Moderate Sedation. He provides anesthesia education in the pre-doctoral, post-doctoral, and dental hygiene levels while also being clinically active in the anesthesia care of children and patients with special needs.

Rebecca Rees, DDS
Dr. Rees grew up in the Southwest, living in both Prescott and Phoenix, Arizona. She attended Arizona State University and graduated summa cum laude with a degree in Justice Studies. Dr. Rees was accepted into the Phi Beta Kappa national honor society during her time at ASU. Upon graduation, Dr. Rees had a change of heart and decided that the medical field, not the legal field, was her calling. She attended dental school at the University of Colorado Denver and graduated in 2012. Dr. Rees was drawn to the rewarding sense of service that comes with providing anesthesia to dental patients who otherwise would not be able to complete their much-needed dental treatment. She attended and completed her anesthesia residency at NYU Lutheran Medical Center in Brooklyn, New York. In the future, she plans on serving the needs of patients in both Colorado and abroad; it is her philosophy that no patient, children and special needs populations in particular, should go without dental treatment out of fear or the inability to make it through an appointment.

Andrew S. Young, DDS
Dr. Young began his undergraduate studies in Biological Sciences at Drexel University in Philadelphia, Pennsylvania. He earned his doctorate at the Ostrow School of Dentistry of USC, before completing a three-year residency in Dental Anesthesiology at the University of Pittsburgh, School of Dental Medicine and the University of Pittsburgh Medical Center. Throughout his training, Dr. Young has actively participated in student education by teaching and lecturing for courses encompassing local anesthesia, medical emergencies, and sedation/general anesthesia concepts. Dr. Young is a published author in notable scientific journals including Anesthesia Progress and Special Care in Dentistry. He has also presented research both nationally and internationally.

Zachary Van Hilsen, DDS
Dr. Van Hilsen attended dental school at the University of Pacific in San Francisco. Upon completing his dental training he joined experienced pediatric dentists in providing healthcare for children in El Paso, TX. This experience cemented his love for caring for pediatric and special needs patients and caused him to pursue the highest level of training he could. He completed his pediatric dentistry residency at the University of Minnesota and his anesthesia training at Ohio State University. During his career, Dr. Van Hilsen has worked to spread and encourage anesthesia training and education to all dentists. This includes teaching dental residents and creating the then-largest undergraduate DACS (Dental Anesthesia Club for Students) in the country at Ohio State. Dr. Van Hilsen believes anesthesia knowledge and practice belongs to all of dentistry and that every dentist should have the opportunity to safely practice anesthesia to the level of his/her training. Dr. Van Hilsen has recently relocated to Colorado with his wife and pups in order to start his own pediatric and special needs practice, and continues to practice the entire anesthesia spectrum including pediatric oral/intra-nasal moderate sedation in his private practice. He is excited to share his unique knowledge and skills with his fellow dentists.

Philip Yen, DDS, MS
Dr. Yen grew up in Northern California’s Bay Area, then traveled to Southern California for his undergraduate studies. Dr. Yen graduated with a degree in Physiology from UCLA, then went across town to attend dental school at the University of Southern California School of Dentistry and graduated Summa Cum Laude. Throughout his education, he has been involved in many research projects including anesthetic drug profiling, novel ophthalmic protein characterization, and DNA repair mechanisms. Dr. Yen is a board certified diplomate and servers on the board of directors of the American Dental Board of Anesthesiology. This appointment, along with serving as a oral board examiner, allows Dr. Yen to make ongoing contributions towards maintaining and elevating a high standard of practice in the field of Dental Anesthesiology. Dr. Yen contributes continuing education review articles to the journal Anesthesia Progress and lectures to various dental groups.

This course is a recertification program geared towards how to safely provide oral conscious sedation for adult and pediatric patients through the study of physiology and pharmacology.

The course on Saturday will complete the 2 year requirement (7 CE hours) for recertification of adult oral sedation. The course on Sunday will complete the 2 year requirement (7 CE hours) or the recertification of pediatric oral sedation. Pediatric oral sedation is defined as 13 and younger. Only recertification courses will be offered. This is NOT an initial certification course.

There will be a review of physiologic principles and how key features affect the administration of sedative medications in different patient populations. Emergency management will be covered in an realistic and applicable manner that reflects the likely scenarios to be encountered when introducing sedation to the dental office. There will be discourse into emergency prevention and proper office training.

This course will present and teach various medications, techniques, and combinations found in published literature, in addition to popular contemporary techniques, with an emphasis on evaluating risk benefit ratios for each. There will be a review on how patient selection and medication selection can help maximize success and reduce the stress of failed outcomes.

There will be an assessment of probabilities and statistics in relation to the dangers of sedation, and how to utilize this data to make purposeful treatment decisions.

Upon completion of this course, participants should be able to:
- Develop a broad knowledge base in the administration of oral conscious sedation.
- Review the techniques and principles of sedation that help uncover the relationship between effectiveness and safety.
- Provide established and novel concepts in sedation for the recertification of an Oral Conscious Sedation Permit in California.

This course is intended for dentists who already possess an adult or pediatric oral (moderate) conscious sedation permit. This is not an initial certification course.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.
