Testimonials

"Thank you so much for such an informative and practical course."
"Great clinical experience!"

Faculty for Hands-On Session:

Dr. Boris Keselbrener, Assistant Professor, Primary Oral Health Care, Ostrow School of Dentistry of USC.

Dr. Patricia Ryan, Clinical Assistant Professor, Primary Oral Health Care, Ostrow School of Dentistry of USC.

Upon completion of this course participants should be able to:

- Understand and apply the latest developments in composite resins
- Incorporate state-of-the-art composite and bonding techniques to their practice
- Perform diastema closures and full direct composite veneers with predictable and aesthetic results
- Prepare several teeth using principles specially design for direct adhesively retained composites restoration
- Perform with predictability, aesthetic, yet simple and fast class II restorations that avoid postoperative pain
- Understand and apply the principles of smile design, color and color-matching for optimum results
- Apply tints and opaquers to composite resins

Jose-Luis Ruiz, DDS, FAGD

Dr. Ruiz has been named as one of the “Top 100 Clinicians in CE” (2006 - 2011) in the US by Dentistry Today. He is a Fellow of the Academy of General Dentistry; Associate Instructor and Mentor at PCC Utah, teaching with Dr. Gordon Christensen; and an independent evaluator of dental products for CRA. Dr. Ruiz has been practicing General Dentistry in the Film Studio District of Los Angeles for over 18 years, where he treats many stars and entertainers. He is regularly consulted on Esthetic Dentistry and his esthetic makeovers have been featured on a number of television shows including NBC Channel 4 News, ABC 7 Vista LA and Channel 52 Telemundo. Dr. Ruiz lectures nationally and internationally and has published multiple papers on cosmetic dentistry and team leadership.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.

Synopsis

This course will review the new paradigm in tooth preparation for adhesively retained direct bonded composite restorations. The principles and technique necessary to achieve predictable bonds to enamel and dentin while minimizing post-operative sensitivity will be described. In addition, a technique for placement and finishing highly esthetic layered polychromatic anterior and posterior composite restorations will be discussed. Dr. Ruiz will address the latest concepts on composite materials and the principles of smile design, color, shade-matching, and use of tints and opaquers to achieve natural exquisite looking restorations.

Participants in this hands-on course will have the opportunity to apply principles discussed during the lectures, and be able to work in USC’s famous “Sim-lab,” one of the most modern and realistic simulator facilities in California. Participants will prepare and finish posterior direct composite restorations, perform polychromatic layered, highly esthetic anterior restorations, as well as Class IV and full direct composite veneers. At the end of the course, participants can take home, bonding materials, composites, polishing supplies, and other supplies.
