Module IA is a 5 CE unit lecture course (8:00 a.m. - 1:00 p.m.)
Module IB is a 3 CE unit hands-on course (2:00 p.m. - 5:00 p.m.)

Please make checks payable and mail to:
Ostrow School of Dentistry of USC
Office of Continuing Education
925 W. 34th Street, Room 201J
Los Angeles, CA 90089-0641
Phone: 213.821.2127
Fax: 213.740.3973
E-mail: cedental@usc.edu
Website: www.uscdentalce.org

Registration Fees

Before April 15, 2012
Dentist:
Module IA: $325
Module IA & IB: $995

Auxiliary:
Module IA: $245
Module IA & IB: $745

After April 15, 2012
Dentist:
Module IA: $395
Module IA & IB: $1,195

Auxiliary:
Module IA: $295
Module IA & IB: $895

Atraumatic Extraction and Minimally Invasive Implant Site Development

(Please complete details, cut or xerox page and send. Online registration at www.uscdentalce.org)

Module IA is a 5 CE unit lecture course (8:00 a.m. - 1:00 p.m.)
Module IB is a 3 CE unit hands-on course (2:00 p.m. - 5:00 p.m.)

Fees include course material, continental breakfast and refreshments during breaks.

Refunds are granted only if a written cancellation notification is received at least 21 days before the course. 50% of the tuition minus processing fee will be refunded if cancellation occurs within 14 days before this course. No refund is granted afterwards. A $70 fee is withheld for processing. For additional registrations, xerox this form and send.
Implant site preservation and development is the concept of maintaining the volume and architecture of both the soft and hard tissues. It is critical to minimize tissue loss during extraction to conserve the natural tissue architecture for future implant placement. Tissues should be preserved and maintained in their original forms as much as possible from the time of tooth extraction to the placement of restoration. This concept is crucial to ensure tissue healing, patient comfort, esthetics and functionality of the final implant restoration. This course will highlight several techniques that facilitate a more esthetic, functional and predictable result in implant dentistry, starting with extraction. Discussion will focus on some of the most commonly asked questions in implant dentistry, such as should grafting be performed after tooth extraction? Which is the best graft material to use? What type of interim provisional restorations to use in order to minimize tissue loss? What decisions should be made regarding immediate implant placement versus delayed implant placement. This course is designed for the novice and advanced clinician and is the first in our series on implant site development and bone grafting. The hands-on portion will focus on minimally invasive extraction and grafting techniques and participants will practice on human cadavers.

SYNOPSIS

- Know the minimally invasive tooth removal techniques and instrumentation
- Remove broken and difficult teeth with minimal flap
- Various incision and flap designs for optimal end results
- Be able to describe the role of socket grafting
- Literature and indications for grafting
- What to look for in choosing a graft material
- Technique
- Know how to evaluate histomorphometric analysis of different graft materials
- Know the management of extraction sites with facial bony defects - “socket repair”
- Know how to manage the post-extraction site in order to minimize hard and soft tissue loss
- Understand the concept of Bone-driven Tissue Regeneration (BTR) and Bone-driven Tissue Transformation (BTT)
- Know the pros and cons of immediate versus delayed implant placement
- Be able to describe minimally invasive bone grafting techniques for the compromised implant site development

UPON COMPLETION PARTICIPANTS SHOULD:

- "Great lecture, will take Dr. Le again."
- "Great. I liked how Dr. Le attempted to simplify very difficult almost seemingly impossible techniques we could use right away in our practice."
- "Excellent course and content. Learned a ton, thanks!!"

SPEAKER

Bach Le, DDS, MD, FICD

Dr. Le is a Clinical Associate Professor, Division of Endodontics, Oral & Maxillofacial Surgery and Orthodontics and Assistant Director, Oral and Maxillofacial Surgery, Ostrow School of Dentistry of USC and USC Medical Center. He is a Diplomate of the American Board of Oral & Maxillofacial Surgeons, the American Dental Society of Anesthesiologists, and the International Congress of Oral Implantologists. Dr. Le holds Fellowship in the International College of Dentists and the International Association of Oral and Maxillofacial Surgeons. He also maintains a private practice in Whittier, California.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.
