7 Hours of Continuing Education
BONDED RESTORATIONS FOR THE POSTERIOR DENTITION: EVIDENCE-BASED CLINICAL APPROACH

Synopsis

- Understand the biomimetic principle
- Know how to select materials for posterior restorations
- Understand the advantages of bonded restorations over traditional approaches
- Understand the principles of tooth preparation for bonded restorations
- Know stratification techniques for composite restorations
- Know how to fabricate a semi-direct composite restoration
- Understand the rationale for an immediate dentin sealing protocol
- Know the luting procedures for bonded restorations

Upon completion of this course participants should:

- Understand the biomimetic principle
- Know how to select materials for posterior restorations
- Understand the advantages of bonded restorations over traditional approaches
- Understand the principles of tooth preparation for bonded restorations
- Know stratification techniques for composite restorations
- Know how to fabricate a semi-direct composite restoration
- Understand the rationale for an immediate dentin sealing protocol
- Know the luting procedures for bonded restorations

Pascal Magne, DMD, PhD
Associate Professor and Don and Sybil Harrington Foundation Chair of Esthetic Dentistry, USC School of Dentistry. He obtained his postgraduate education in Prosthodontics and Operative Dentistry from the University of Geneva. He was awarded with major grants by the Swiss Science Foundation, the Swiss Foundation for Medical-Biological Grants and the International Association for Dental Research. He also spent two years as a full-time research scholar in Biomaterials and Biomechanics at the University of Minnesota between 1997 and 1999. In 2002 he received his PhD degree. He is the author of the textbook Bonded Porcelain Restorations.
