**★ Life-Long Tradition and Excellence ★**
This course focuses on chronic Orofacial Pain (OFP) and headaches (e.g., Neuropathic Pain, Neurovascular Pain, Neuralgia, Neuritis and Neurooma). It reviews underlying mechanisms of pain induction, nerve injury and repair, sensitization and spontaneous ectopic pain generation. Lectures include an explanation of how various analgesic blocks and sensory testing procedures, in combination with historical information, produce a differential diagnosis of neurogenic and headache pain. Lectures will also focus on the appropriate pharmacologic, behavioral, surgical, and physical medicine management procedures for these conditions. Finally, real patient cases will be presented with the goal of helping the attendee become more comfortable in diagnosing and treating OFP disorders and providing a new understanding of chronic pain.

**Topics to be discussed:**
- Chronic orofacial pains (neuralgias, neumomas and neuropathies of the trigeminal nerve)
- Headache disorders which mimic Temporomandibular Disorder (TMD) and cause orofacial pain
- Neurology for the novice
- New medications used for pain
- Examination methods for chronic pain

**Testimonial**

“Dr. Clark’s lecture was well organized, thorough, well-researched, professionally articulated, and warmly communicated. He shares a wealth of information for the general dentist to make more informed diagnosis, treatment plans, and referrals. His knowledge, and more importantly, his ability to communicate this knowledge to the general dentist is extensive, profound and articulate.”
- Dr. Samantha Humke, Loves Park, Illinois

“The course material is excellent and very simple and easy to follow in daily practice.”
- Dr. Nilima Patel, Duarte, California
