Understand the neuroanatomy, neurophysiology and pathobiology of the trigeminal nociceptive system

Understand neurogenic and neurovascular diseases

Conduct a differential diagnosis of neurogenic and headache disorders

Understand the current therapies used for these problems

Understand how neurovascular headaches can convert from episodic to chronic

Understand the latest medications that are used for managing both neurovascular and neurogenic pain

Understand how to make stents, perform intramuscular injections, and conduct a myofascial examination

This course focuses on Chronic Orofacial Pain and headaches (e.g. Neuropathic Pain, Neurovascular Pain, Neuralgia, Neuritis and Neuroma). It reviews underlying mechanisms of pain induction, nerve injury and repair, sensitization and spontaneous ectopic pain generation. Lectures include an explanation of how various analgesic blocks and sensory testing procedures, in combination with historical information, produce a differential diagnosis of neurogenic and headache pain. Lectures will also focus on the appropriate pharmacologic, behavioral, surgical and physical medicine management procedures for these conditions. Finally, real patient cases will be presented with the goal of helping the attendee become more comfortable in diagnosing and treating OFP disorders and providing them with a new understanding of chronic pain.

Topics to be covered:

- Chronic Orofacial Pains (neuralgias, neumomas and neuropathies of the trigeminal nerve)
- Headache disorders which mimic TMD and cause orofacial pain
- Neurology for the novice
- New medications used for pain
- Examination methods for chronic pain

Upon completion of this course you will be able to:

- Understand the neuroanatomy, neurophysiology and pathobiology of the trigeminal nociceptive system
- Understand neurogenic and neurovascular diseases
- Conduct a differential diagnosis of neurogenic and headache disorders
- Understand the current therapies used for these problems
- Understand how neurovascular headaches can convert from episodic to chronic
- Understand the latest medications that are used for managing both neurovascular and neurogenic pain
- Understand how to make stents, perform intramuscular injections, and conduct a myofascial examination
