University of Southern California Herman Ostrow School of Dentistry is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

★ Life-Long Tradition and Excellence ★
**SYNOPSIS**

Periodontal disease is a chronically destructive condition affecting many patients. The primary bacterial etiology with several possible local and systemic risk factors account for a rather complex disease entity. It is crucial for clinicians to include periodontal considerations in their treatment planning and in the active phase of therapy.

This course is designed to provide clinicians with the most current knowledge on fundamental issues in periodontics. Participants will learn how to diagnose periodontal disease and related conditions and to assess teeth prognosis. The course will also explore several periodontal treatment modalities and their relation to restorative and reconstructive aspects of treatment. State-of-the-art reviews and position statements by the American Academy of Periodontology (AAP) will be included.

The information presented in this course will be clinically-relevant to help participants provide optimal comprehensive care for their patients.

*This course is intended for general dentists, periodontists, prosthodontists, oral surgeons, endodontists, dental hygienists, and other members of the dental team.*

**TOPICS TO BE DISCUSSED**

- Bacterial etiology of periodontitis
- Secondary etiologies and risk factors
- Performing a comprehensive periodontal examination
- Classification of periodontal diseases and conditions (AAP)
- How to determine differential diagnoses: periodontal, endodontic and combined lesions
- How to determine prognosis?
- Systemic and localized antibiotic regimens: when is each one indicated?
- The relationship between occlusion and periodontal disease
- The furcation dilemma: What are the treatment options?
- Periodontal disease and the link with systemic diseases
- Surgical vs. non-surgical treatments: when are they indicated?
- Gingival lesions and indications for biopsy
- What is appropriate periodontal maintenance?
- When to refer to a specialist (AAP)
