Dental Trauma: Multidisciplinary Approaches for Diagnosis, Treatment and Prevention

USC Bovard Auditorium
Friday, June 12, 2009
9:00 a.m. - 5:00 p.m.

Online registration at www.uscdentalce.org

Dental Trauma: Multidisciplinary Approaches for Diagnosis, Treatment and Prevention

Registration Fees

Before May 10, 2009
Delta Dental Dentist: $60
Non-Delta Dentist: $195

After May 10, 2009
Delta Dental Dentist: $75
Non-Delta Dentist: $215

Fees include continental breakfast and refreshment during breaks

IMPLANT THERAPY IN THE ESTHETIC ZONE
Friday - Sunday, April 3 - 5, 2009

COMMON ORAL LESIONS (1): UPDATE ON EARLY ORAL CANCER AND PRECANCER DETECTION
Saturday, April 4, 2009

DIGITAL PHOTOGRAPHY (PARTS I & II)
Part I: Friday, April 17, 2009
Part II: Saturday, April 18, 2009

OBSURCTIVE SLEEP APNEA, SNORING AND DENTAL ADVANCEMENT
Friday - Saturday, April 17 - 18, 2009

USC NEW ODONTIC SEMINAR
Friday, April 24, 2009

USC ESTHETIC DENTISTRY CONTINUUM 2009
Module I: Friday - Sunday, April 24 - 26, 2009
Module II: Friday - Sunday, May 29 - 31, 2009
Module III: Friday - Sunday, June 26 - 28, 2009

MAKING SENSE OUT OF REMOVABLE PARTIAL DENTURE DESIGN
Saturday, April 25, 2009

IMPLANT THERAPY IN COMPROMISED SITES
Friday - Sunday, May 1 - 3, 2009

ADVANCED BONE AND SOFT TISSUE AUGMENTATION CADAVER WORKSHOP
Sunday, May 3, 2009

NEW APPROACHES FOR ANT MICROBIAL TREATMENT OF PERIODONTAL DISEASE
Friday, May 8, 2009

THE USES OF PHOTOSHOP & POWERPOINT IN MODERN DAY DENTISTRY: A HANDS-ON COURSE
Saturday, May 9, 2009

PHYSICAL EVALUATION
Monday, May 18, 2009

EMERGENCY MEDICINE
Tuesday, May 19, 2009

MONITORING AND CLINICAL EMERGENCY MEDICINE
Wednesday, May 20, 2009

Dental Trauma: Multidisciplinary Approaches for Diagnosis, Treatment and Prevention

Bovard Auditorium
USC University Park Campus
Friday, June 12, 2009
9:00 a.m. - 5:00 p.m.
Dennis-Duke R. Yamashita, DDS, FACD, FICD
Dr. Yamashita is Professor of Clinical Dentistry, Division of Surgical Therapeutic and Bioengineering Sciences and Director of the Oral and Maxillofacial Surgery Residency Program, USC School of Dentistry and USC Medical Center. He is a Diplomate of the American Board of Oral and Maxillofacial Surgeons. Dr. Yamashita holds a Fellowship of the American College of Dentists, and is a Fellow of the International College of Dentists.

Topic: Maxillo-facial trauma

Leif K. Bakland, DDS
Dr. Bakland has been involved in teaching, research and professional publications for over 30 years. He also provided leadership to many professional organizations. Since 1976, he has been a full-time faculty member in the Department of Endodontics at Loma Linda University School of Dentistry where he currently serves as professor and chair. He has lectured extensively worldwide and authored or co-authored more than 60 publications. He is the co-editor of the fourth, fifth and sixth editions of Ingle’s Endodontics, and the first and second editions of Traumatic Dental Injuries. He is an associate editor of Dental Traumatology. As an active member of several organizations, he has served in many capacities such as secretary for the AAE Board of Directors, Past President and Past Director of the American Board of Endodontics. Founding Member, Past President and Past Director of the College of Diplomates of the ABE, and is the current Executive Director of the International Association of Dental Traumatology.

Topic: Current recommendations for management of traumatic dental injuries

Ilan Rotstein, DDS (Course Director)
Professor of Endodontics and Chair, Division of Surgical, Therapeutic and Bioengineering Sciences and Associate Dean for Continuing Oral Health Professional Education at the USC School of Dentistry. Dr. Rotstein is Chair of the Research Committee of the International Federation of Endodontic Associations and past member of the Research and Scientific Affairs Committee of the American Association of Endodontists. He published more than 100 papers and textbook chapters in the dental literature and has lectured extensively nationally and internationally in more than 20 countries.

Topic: Endodontic considerations for treatment of avulsed teeth

Homayoun H. Zadeh, DDS, PhD
Associate Professor at the USC School of Dentistry. Dr. Zadeh is a graduate of the USC School of Dentistry. He completed the advanced clinical education in Periodontology and earned his PhD degree in Immunology from the University of California San Francisco and his Certificate in Endodontics from USC. He is the author of numerous articles and has presented nationally and internationally.

Topic: Prevention of traumatic dental injuries

Ramon G. Roges, BS, DDS
Associate Professor of Clinical Dentistry, Division of Surgical, Therapeutic and Bioengineering Sciences, and Director of Urgent Care, Trauma and Sports Dentistry, at the USC School of Dentistry. Dr. Roges earned his DDS degree from the University of California San Francisco and his Certificate in Endodontics from USC. He is the author of numerous articles and has presented nationally and internationally.

Topic: Prevention of traumatic dental injuries

In recent years, increased research data has enhanced our knowledge of the clinical and biological aspects of tooth, bone and soft tissue interactions following dental trauma. This comprehensive course will discuss the benefits of a multidisciplinary team approach to improving a patient’s quality of life following dental trauma by utilizing effective strategies for its diagnosis, treatment and prevention.

Upon completion of this course, participants will be able to:

- Identify the epidemiological and predisposing factors of dental trauma
- Classify the different traumatic dental injuries
- Implement the most recent, state-of-the-art diagnostic and treatment modalities
- Become familiar with maxillo-facial traumatic injuries and their complications
- Understand specific restoration and rehabilitation concepts
- Use effective preventive measures
- Know when to refer a patient to a specialist

Synopsis

Trumatic injuries to teeth and surrounding tissues present multiple challenges to the oral health professional and require multidisciplinary clinical approaches for diagnosis, treatment and prevention modalities. Although the most vulnerable periods for dental trauma occur in childhood and adolescence, long-term complications can be considerable. Often, such complications can result in life-long, time-consuming and costly treatments and maintenance. Therefore, dental trauma is not only a concern for oral healthcare professionals but also for society as a whole.
