★ Life-Long Tradition and Excellence ★
Ziv Simon, DMD, MSc
Dr. Simon is a Diplomate of the American Board of Periodontology and a Fellow of the Royal College of Dentists of Canada. He publishes and lectures nationally and internationally on esthetic, tissue reconstruction and computer-guided implant dentistry. Dr. Simon is the founder of the Beverly Hills Multidisciplinary Dental Study Group and the president of the Beverly Hills Academy of Dentistry. He maintains a private practice limited to periodontics and dental implants in Beverly Hills, California. Dr. Simon is the creator of SurgicalMaster™, a surgical training program for dentists.

**Topic: Soft Tissue Esthetics for the Natural Dentition and Implant Restorations**

Ilan Rotstein, DDS (Course Director)
Dr. Rotstein is Professor and Chair of the Division of Endodontics, Orthodontics and General Practice Residency and Associate Dean of Continuing Professional Education at the Herman Ostrow School of Dentistry of USC. He has been Chair of the Research Committee of the American Academy of Endodontists. Dr. Rotstein published more than 150 publications, including textbook chapters in the dental literature and has lectured extensively nationally and internationally in more than 20 countries.

**Topic: Diagnosis, Treatment and Prognosis of Endodontic-Periodontal Diseases**

Parish Sedghizadeh, DDS, MS
Dr. Sedghizadeh is a tenure-track Assistant Professor in the Division of Periodontology, Diagnostic Sciences and Dental Hygiene at the University of Southern California, Herman Ostrow School of Dentistry. He also serves as Director of the USC Center for Biofilms research laboratory. He received his Bachelor of Science degree in biology from UCLA, and his Doctorate of Dental Surgery from USC. After his doctorate, he pursued specialty training in Oral and Maxillofacial Pathology at Ohio State University, where he also attained a Master of Science degree in Oral Biology and fellowship status in the American Academy of Oral and Maxillofacial Pathology. Dr. Sedghizadeh is currently a Diplomate of the American Board of Oral and Maxillofacial Pathology. He conducts research, publishes, consults and teaches as a maxillofacial pathologist with an active clinical practice at USC. Dr. Sedghizadeh has over 50 peer-reviewed publications, and his research laboratory, clinical practice and clinical research projects at USC currently focus on the characterization and treatment of head and neck pathology and microbial biofilm infections affecting the head and neck, particularly jaw osteonecrosis.

**Topic: The Oral-Systemic Connection**

George C. Cho, DDS, FACP
Dr. Cho is Associate Professor in the Division of Restorative Sciences, Co-Director of the Advanced Education in Prosthodontics and Director of the Predoctoral Implant Dentistry at the Herman Ostrow School of Dentistry of USC. Dr. Cho received his dental degree in 1987 and graduated from the USC Advanced Education Program in Prosthodontics in 1990, and has been since a full time faculty member. He is also a fellow of the American Board of Prosthodontics, member of the American Academy of Restorative Dentistry, ADA, CDA, and Western Los Angeles Dental Society. Dr. Cho maintains a private practice limited to Prosthodontics in Torrance, California.

**Topic: Why Not Implant Dentistry?**

**SYNOPSIS**

The goals of modern dentistry are to provide patients with excellent oral health, function and esthetics. A multidisciplinary team approach is essential to achieve these goals by enhancing case selection, treatment planning and prognosis thereby promoting clinical success and patient satisfaction.

In this course, a team of experts from the Herman Ostrow School of Dentistry of USC will present current interdisciplinary clinical approaches and discuss techniques to help enhance successful outcome of your clinical cases.

**Topics to be covered:**

- Oral-systemic connection in health and disease
- Multidisciplinary approaches to treat oral systemic diseases
- Risk assessment of patients with potential pathology and preventive measures
- Interrelationship between endodontic and periodontal diseases
- Diagnosis and clinical decision-making for treating endodontic-periodontal cases
- Esthetic crown lengthening
- Predictable tissue grafting for root coverage
- Esthetic flap design and manipulations
- Advantages and disadvantages of implant dentistry
- Financial implications of implant vs. conventional dentistry
- Treatment planning sequence for uncomplicated implants
- Multidisciplinary approach for soft tissue management around natural dentition and implant restorations
- Management of complications
