**Susan B. Dopart, MS, RD, CDE**
Susan is a nutrition and fitness consultant who has been in private practice for more than 25 years. Susan specializes in child and adult medical nutrition-related issues associated with insulin resistance, diabetes, and endocrinology, cancer, PCOS, and exercise. Before establishing her own practice, Susan worked at UCLA as both a medical and kidney dietitian. Susan has written and contributed to multiple publications, and is author of A Recipe for Life by the Doctor’s Dietitian, Healthy You, Healthy Baby: A Mother’s Guide to Gestational Diabetes, A Healthy Baker’s Dozen: Gluten-free low sugar cookies, and 101 Ways to Control your Diabetes.

**Topic:** Anti-Inflammatory Eating and Dental/Medical Health

---

**David Levine, DDS**
Dr. Levine is a Diplomate of the American Board of Periodontology. He was Director of Undergraduate Periodontology at the Herman Ostrow School of Dentistry from 1992-1996. He has been teaching dental students and dental hygiene students about periodontal disease and the treatment of periodontal disease at the Herman Ostrow School of Dentistry of USC since 1990. He has published articles regarding periodontal disease and treatment in several different peer reviewed journals and has lectured both nationally and internationally. He is currently in private practice limited to Periodontology and Dental Implants.

**Topic:** Implants Are Good, Teeth Are Better

---

**Mark M. Urata, MD, DDS, FACS, FAAP**
Dr. Urata is Audrey Skirball Kenis Endowed Chair and Chief Division of Plastic and Reconstructive Surgery Keck School of Medicine of USC. He is the Division Chair of Oral and Maxillofacial Surgery Ostrow School of Dentistry of USC. Dr. Urata is also the Division Head of Plastic and Maxillofacial Surgery Children’s Hospital Los Angeles.

**Topic:** Craniofacial Surgery: How Dentistry has Made All The Difference

---

**Anti-Inflammatory Eating and Dental/Medical Health**
Do you ever wonder how to talk to patients about their diet to assist with dental health? How is an anti-inflammatory diet related to diseases like diabetes, heart disease, cancer and Alzheimer’s? This presentation will give detail to how diet contributes to various medical issues including dental disease. Included topics will be how insulin resistance and the Western diet contributes to periodontal disease, supplements that foster health and anti-inflammatory eating.

**Implants Are Good, Teeth Are Better**
Current trends in the treatment of periodontal disease around natural teeth and dental implants will be discussed. Implants are good and have a very high success rate, but are they always the best solution? Various treatment methods for retention of teeth with moderate to advanced bone loss have, also, shown long-term success rates. This presentation will bring about a lively discussion regarding the treatment of periodontal disease and the importance and reliability of periodontal therapy to maintain teeth. Audience participation will be encouraged.

**Craniofacial Surgery: How Dentistry has Made All The Difference**
This will be an introduction to the field of craniofacial surgery. With the recent release of the movie Wonder, there is increased interest in the reconstruction of children born with facial differences. The presentation will introduce the author’s experience having trained as both an oral and maxillofacial surgeon and a plastic surgeon and how that unique combination has affected treatment paradigms and research.
