Life-Long Tradition and Excellence
Speakers

Ann Eshenaur Spolarich, RDH, PhD, FSCDH
Ann Eshenaur Spolarich is an internationally recognized author and speaker on pharmacology and the care of medically complex patients. She has presented over 950 lectures and has over 125 professional presentations. She is Professor, Course Director of Clinical Medicine and Pharmacology, and Director of Research at the Arizona School of Dentistry and Oral Health, where she also teaches part-time in the Special Care Clinic. Ann also serves as Associate Director of the National Center for Dental Hygiene Research & Practice. Ann practices part-time, specializing in geriatrics.

Topic: Comprehensive Health Prevention for Older Adults

Joyce Y. Sumi, RDH, MS
Joyce received her Bachelor of Science in Dental Hygiene from University of Southern California. She is a graduate of the Master of Science in Dental Hygiene program from the University of California, San Francisco and recipient of UCSF’s Elizabeth Fuhriman Gardner Award. Joyce is an Associate Professor of Clinical Dentistry, former co-director of the Master of Science in Dental Hygiene and Director of the Community Oral Health Certificate program at USC. She currently serves on the executive board for the ADEA Special Interest Group for Graduate Dental Hygiene Education Programs and on the National Advisory Board for the National Center for Dental Hygiene Research and Practice. Publications include professional journal articles and co-authorship on the Hand-Activated Instrumentation chapter for Darby and Walsh’s Dental Hygiene Theory and Practice. She received her Bachelor of Science in Pharmacology, and Director of Research at the Arizona School of Dentistry and Oral Health, where she also teaches part-time in the Special Care Clinic. Ann also serves as Associate Director of the National Center for Dental Hygiene Research & Practice. Ann practices part-time, specializing in geriatrics.

Topic: Insights into Periodontal Therapy

Michaela T. Nguyen, RDH, MS
Michaela is the pre-clinical director and senior clinical instructor in the Dental Hygiene program at University of Southern California. She received her Bachelor of Science in Dental Hygiene at USC and her Master of Science in Dental Hygiene at UCSF. She is a contributor of numerous articles on advanced instrumentation for the journal, Dimensions of Dental Hygiene. Nguyen coauthored the chapter on Hand-Activated Instrumentation in the 4th edition of Darby and Walsh’s Dental Hygiene Theory and Practice. She conducts and participates in advanced instrumentation hands on workshops throughout the country and internationally.

Topic: Insights into Periodontal Therapy

Comprehensive Health Prevention for Older Adults

Attainment of optimal oral health and wellness is a challenging and dynamic process that occurs along the aging continuum. This course will present a new model of health prevention for older adults, with an emphasis on ensuring safety, minimizing disease risks, maintaining function, and optimizing oral health quality of life. Oral health care professionals will learn how to individualize preventive strategies to improve desired health outcomes for their elderly patients.

Upon completion participants will be able to:
• Identify desired health outcomes of implemented preventive strategies in the older adult population.
• Describe important variables that influence an individual’s ability to attain oral wellness.
• Identify components of a preventive practice plan to ensure patient safety.
• Discuss how lifelong habits contribute to oral and systemic health risks in elderly individuals.
• Discuss how oral disease impacts oral health quality of life.
• Discuss issues and concerns that must be considered when formulating a dental hygiene treatment plan for prevention in older patients.

Insights into Periodontal Therapy

Periodontal disease continues to be a significantly widespread oral health problem. Clinicians play a significant role in the management of this disease. Recent updates on categorizing periodontal disease provides a new framework to reexamine treatment planning and monitoring case management of periodontitis. This session focuses on non-surgical treatment strategies using current advances and best practices to optimize treatment outcomes.

Topics to be covered:
• Describe the new AAP Classification of Periodontal and Peri-implant diseases and conditions
• Discuss the medical model approach to periodontal disease management.
• Apply emerging technology and techniques in periododontal therapy.

This course is intended for dentists, dental hygienists, and dental assistants

Please be cautioned about the potential risks of using limited knowledge when integrating new techniques into your practice.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.
