Dentist: $185 / $205
Auxiliary: $155 / $175
The section on the California Dental Practice Act will present the recent changes in the laws that impact the practice of dentistry. It will cover the topics necessary for renewal of your license, including your duties as mandated reporter of child, elder, and domestic partner abuse; violations of the Dental Practice Act; and powers of enforcement held by the Dental Board.

Upon Completion of the Course Participants Should Be Able To:

• Know the principles of disease transmission and Universal/Standard precautions

• Understand Cal-OHSA compliance issues, sterilization and disinfection

• Become familiar with the updated CDC infection control guidelines

• Understand the infection control practices mandated by the Dental Board of California

• Know the recent changes in the Dental Practice Act and the basic rules for avoiding problems that could place your dental license in jeopardy

• Know how to use dental auxiliaries effectively within current California law

• Provide a safer environment for patients and the dental team

This course is designed for all dental licensees and satisfies the mandatory requirement that all licensed dental healthcare personnel take two units each cycle. Course participants will also gain knowledge about emerging diseases with potential implications for dentistry.

* This class satisfies the California Infection Control and California Dental Practice Act license renewal requirements for dentists, dental hygienists, and currently licensed registered dental assistants.
