University of Southern California Herman Ostrow School of Dentistry is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.
New diseases, as well as the return of some once thought eradicated diseases, are a major concern in the modern dental practice. It seems as if every few months a disease is developing and capturing headlines. The signs and symptoms of many emerging diseases such as community-acquired methicillin-resistant Staphylococcus aureus (CA-MRSA), seasonal flu and development of drug-resistant bacteria will be described, and effective preventive measures will be discussed. The course will also cover topics such as general disease transmission, standard precautions, disinfection and sterilization as well as updated requirement for using sterile water or a disinfecting or antibacterial agent when irrigating exposed dental pulp.

The course will review Cal-OSHA’s top dental office citations, discuss the CDC guidelines as well as the current mandated minimum standards for infection control in the dental setting from the Dental Board of California regulations. Participants will be provided with an easy-to-apply checklist for reviewing their practice. The course will review Cal-OSHA’s top dental office citations, discuss the CDC guidelines as well as the current mandated minimum standards for infection control in the dental setting. It will cover the topics necessary for renewal of your license, including your duties as mandated reporter of child, elder, and domestic partner abuse; violations of the Dental Practice Act; and powers of enforcement held by the Dental Board.

Upon Completion of the Course
Participants Should Be Able To:

- Know the principles of disease transmission and universal/precautions.
- Understand Cal-OSHA compliance issues, sterilization and disinfection.
- Become familiar with the updated CDC infection control guidelines.
- Understand the infection control practices mandated by the Dental Board of California.
- Know the recent changes in the Dental Practice Act and the basic rules for avoiding problems that could place your dental license in jeopardy.
- Know how to use dental auxiliaries effectively within current California law.
- Provide a safer environment for patients and the dental team.

This course is designed for all dental licensees and satisfies the mandatory requirement that all licensed dental healthcare personnel take two units each renewal cycle. Course participants will also gain knowledge about emerging diseases with potential implications for dentistry.

*This class satisfies the California Infection Control and California Dental Practice Act license renewal requirements for dentists, dental hygienists, and currently licensed registered dental assistants.

Testimonials

“Dr. Joyce and Patricia do an excellent job providing this mandatory class. They are pleasant speakers, extremely organized and informative.”
- Maya Fulcher, RDH, Los Angeles, CA

“It was a great course - right to the point. Speakers were both well versed in their subjects.”
- Dr. Brian Kay, Tyler, TX
