ENDODONTICS FROM A TO Z:
A HANDS-ON WORKSHOP FOR THE GENERAL PRACTITIONER

21 hours of Lectures
21 hours of Hands-On Experience

Ostrow School of Dentistry of USC
Friday - Sunday, 9:00 a.m. - 5:00 p.m.
June 1 - 3, 2012 (Part I)
June 15 - 17, 2012 (Part II)

★ Life-Long Tradition and Excellence ★
Endodontics has gone through many exciting changes in the past several years. Recent advances in technology, materials and equipment have changed the way endodontics is practiced today. These advances have made it possible to efficiently perform successful endodontic treatment with improved precision, predictable results, and with much greater patient acceptance. This comprehensive state-of-the-art course includes series of seminars and hands-on workshops specially designed for General Dentists who wish to advance their knowledge and clinical skills in the art and science of endodontics. A team of endodontic specialists from the Ostrow School of Dentistry of USC will thoroughly discuss evidence-based clinical and biological concepts of modern endodontic therapy. These experts will walk you, from start to finish, through all the necessary steps and phases that will enable you to enhance the way you practice endodontics so you can provide the best standards of endodontic care to your patients.

During the 3-day hands-on part of this course you will have the opportunity to apply the principles discussed by the USC team of experts and practice in one of the most advanced facilities in California. You will perform endodontic treatment from start to finish in both single-rooted and multi-rooted teeth and will also practice endodontic retreatment. Without doubt, this course will be a complete learning experience!

**Endodontics: From A to Z - Registration Form**

(please cut or xerox this page and send. Online registration at www.uscdentalce.org)

**Limited Time Offer!**

Participants will enter a special raffle to win a copy of the world renowned textbook, Ingle’s Endodontics - 6th Edition, a $150 value! Winner will be chosen in a random drawing at the first day of the course.

**Topics to be covered**

- Diagnosis and treatment planning
- Case selection in endodontics
- Achieving effective anesthesia for endodontic treatment
- Management of anxiety and pain in endodontics
- Preparation for endodontic treatment
- The operating microscope and its uses in endodontics
- Current principles of endodontic access
- Canal length determination including electronic apex locators
- Nickel Titanium rotary systems and techniques
- Canal irrigation and intracanal medication
- Procedural errors and their prevention
- Root canal obturation techniques
- Management of calcified canals
- Use of ultrasonics to facilitate treatment
- Endodontic retreatment
- Endodontic-periodontal interrelationship
- Endodontic emergencies
- Achieving better success in endodontic cases
