113 Years of Tradition and Excellence

From Treatment Planning to Fixed Restoration

Esthetic Full-Mouth Implant Reconstruction Course Series

USC School of Dentistry
Module I: Friday, March 19, 2010
Module II: Saturday, March 20, 2010
Module III: Sunday, March 21, 2010
9:00am - 5:00pm

Lectures & Hands-On Workshop

This course is one of three in the successful series of Esthetic Full-Mouth Implant Reconstruction offering a comprehensive review of this treatment modality. It will expose you to treatment planning and sequencing in a step by step approach to develop your knowledge in this field. You may take each module separately, but we encourage you to take all modules to maximize your learning experience and fully comprehend this treatment modality.

**MODULE I - Lecture**

- From overdentures to full-mouth fixed
- Fundamental treatment options for the edentulous patient.
- Comprehensive diagnosis and treatment planning.
- Individual attachments vs. bar overdentures.
- Implant supported vs. implant-tissue supported overdentures.
- Esthetic metal-resin and metal-ceramic fixed implant reconstruction.
- Practical and time saving tips for full-mouth reconstruction.

**MODULE II - Lecture**

- Fixed prostheses designs and treatment planning
- Simplicity in design: from one-piece complete arch to segmented design.
- From screw retained to custom abutments and telescopic copings.
- Esthetic full-mouth implant reconstruction in one visit?
- Fixed implant reconstruction of patients with severely resorbed ridges and lack of lip support.
- Surgical reconstruction to recreate lip support.
- Management of complications.

**MODULE III - Hands-On Workshop (Limited Attendance)**

Conversion of Complete Dentures to Fixed Implant Restorations in One Clinical Visit

Faculty: Harel Simon, DMD; Joseph Field, DDS; Sheryl Regalado, DMD; Take Katayama, CDT; Gordon Russell, RDT

In this unique and exclusive course, participants will receive models of completely edentulous arches with implants and corresponding complete dentures. Each participant will convert a complete denture to a fixed implant supported provisional restoration.

This technique is the cornerstone philosophy for a simplified approach for implant reconstruction. Mastering this technique simplifies the restorative sequence significantly and enhances the predictability of the treatment from an esthetic and functional point of view. Upon completion, participants will receive these models for patient education and demonstration of full-mouth implant reconstruction.

**TOPICS TO BE COVERED**

- Diagnostic tools such as flangeless record base, wax-up, setup, intraoral mock-up and radiographic templates.
- Esthetic pontic design: Horizontally submerged and fused pontic designs.
- Gingiva-colored ceramics design and technique.
- Provisionalization: fixed or removable?
- Transitional implants to support provisional restorations.
- The conversion prostheses as a treatment philosophy.
- Communication with the surgeon, laboratory and patient to obtain predictable results.
- Laboratory techniques and procedures.
- Surgical considerations.

**This course is recommended for:**

- Restorative dentists, prosthodontists, periodontists and oral surgeons who would like to be exposed to state-of-the-art esthetic fixed implant reconstruction of the edentulous patient.
- Laboratory technicians, dental assistants and treatment coordinators who would like to learn about this treatment modality, to be able to present this option to patients and collaborate as part of the dental implant team.

**Registration Fees (Please Check Boxes)**
