From Treatment Planning to Fixed Restoration

Module I: Friday, March 22, 2013
Module II: Saturday, March 23, 2013
Module III: Sunday, March 24, 2013
9:00am - 5:00pm

Hands-On Workshop

Esthetic Full-Mouth Implant Reconstruction
Course Series

Comprehensive Course Series

CORPORATE SPONSORS

★ Life-Long Tradition and Excellence ★
Restoring the edentulous patient with an aesthetic reconstruction may present numerous challenges to the clinician. The patient’s occlusal vertical dimension, centric relation, esthetics and phonetics need to be determined and maintained throughout the restorative process. With the advent of dental implants, there are various treatment options available today to address the patient’s aesthetic and functional needs.

This course will discuss diagnosis and treatment planning for fixed implant supported reconstruction. A variety of treatment options and prosthesis designs will be introduced and the fixed implant supported reconstruction. A variety of treatment options and prosthesis designs will be introduced and the fixed implant supported reconstruction.

This course is recommended for:

- Restorative dentists, prosthodontists, periodontists and oral surgeons who would like to be exposed to state-of-the-art esthetic fixed implant reconstruction of the edentulous patient.
- Laboratory technicians, dental assistants and treatment coordinators who would like to learn about this treatment modality, to be able to present this option to patients and collaborate as part of the dental implant team.

TOPICS TO BE COVERED

- Diagnostic tools such as flangeless record base, wax-up, setup, intraoral mock-up and radiographic templates.
- Esthetic pontics: horizontally submerged & fused pontic designs.
- Gingiva-colored ceramics design and technique.
- Provisionalized: fixed or removable?
- Transitional implants to support provisional restorations.
- The conversion prosthesis as a treatment philosophy.
- Communication with the surgeon, laboratory and patient to obtain predictable results.
- Laboratory techniques and procedures.
- Surgical considerations.

This course is recommended for:

- Restorative dentists, prosthodontists, periodontists and oral surgeons who would like to be exposed to state-of-the-art esthetic fixed implant reconstruction of the edentulous patient.
- Laboratory technicians, dental assistants and treatment coordinators who would like to learn about this treatment modality, to be able to present this option to patients and collaborate as part of the dental implant team.

This course is one of three in the successful series of Esthetic Full-Mouth Implant Reconstruction offering a comprehensive review of this treatment modality. It will expose you to treatment planning and sequencing in a step by step approach to develop your knowledge in this field. You may take each module separately, but we encourage you to take all modules to maximize your learning experience and fully comprehend this treatment modality.

MODULE I - Lecture
From Overdentures to Full-Mouth Fixed

- Fundamental treatment options for the edentulous patient.
- Comprehensive diagnosis and treatment planning.
- Indivudal attachments vs. bar overdentures.
- Implant supported vs. implant-tissue supported overdentures.
- Esthetic metal-resin and metal-ceramic fixed implant reconstruction.
- Practical and time saving tips for full-mouth reconstruction.

MODULE II - Lecture
Fixed Prostheses Designs and Treatment Planning

- Simplicity in design: from one-piece complete arch to segmented design.
- From screw retained to custom abutments and telescopic copings.
- Esthetic full-mouth implant reconstruction in one visit?
- Fixed implant reconstruction of patients with severely resorbed ridges and lack of lip support.
- Surgical reconstruction to recreate lip support.
- Management of complications.

MODULE III - Hands-On Workshop
(Limited Attendance)
Conversion of Complete Dentures to Fixed Implant Restorations in One Clinical Visit

Faculty: Harel Simon, DMD; Joseph Field, DDS; Sheryl Ragulada, DMD; Take Katahara, CDT

In this unique and exclusive course, participants will receive models of completely edentulous arches with implants and corresponding complete dentures. Each participant will convert a complete denture to a fixed implant supported provisional restoration.

This technique is the core philosophy for a simplified approach for implant reconstruction. Mastering this technique simplifies the restorative sequence significantly and enhances the predictability of the treatment from an esthetic and functional point of view.

Upon completion, participants will receive these models for patient education and demonstration of full-mouth implant reconstruction.

Registration Fees (Please Check Boxes)

- **Complete Course:**
  - Modules I, II & III (Friday - Sunday, March 22 - 24, 2013)
  - Before February 15, 2013: Dentist $1,995; Auxiliary $1,695
  - After February 15, 2013: Dentist $2,245; Auxiliary $1,845

- **Module I: Lecture (Friday, March 22, 2013)**
  - Before February 15, 2013: Dentist $295; Auxiliary $225
  - After February 15, 2013: Dentist $375; Auxiliary $265

- **Module II: Lecture (Saturday, March 23, 2013)**
  - Before February 15, 2013: Dentist $295; Auxiliary $225
  - After February 15, 2013: Dentist $375; Auxiliary $265

- **Module III: Hands-On (Sunday, March 24, 2013)**
  - Includes free implant reconstruction model - a $595 value
  - Before February 15, 2013: $1,875
  - After February 15, 2013: $1,995

*Continuing Education Units Per Day <

Refunds are granted only if a written cancellation notification is received at least 21 days before the course. 50% of the tuition minus processing fee will be refunded if notification occurs within 14 days before the course. No refunds are granted after the 14 day cancellation period. All cancellations after the 14 day cancellation period are subject to a $100 processing fee. For additional registrations, renew this form and send.
This course will discuss diagnosis and treatment planning for fixed implant supported reconstruction. A variety of treatment options and prosthesis designs will be introduced and the restorative sequence will be reviewed in a step-by-step simplified approach to provide a predictable outcome with esthetic implant reconstruction.

**TOPICS TO BE COVERED**

- Diagnostic tools such as flangeless record base, wax-up, setup, intraoral mock-up and radiographic templates.
- Esthetic pontics: horizontally submerged & fused pontic designs.
- Gingiva-colored ceramics design and technique.
- Provisionalization: fixed or removable?
- Transitional implants to support provisional restorations.
- The conversion prosthesis as a treatment philosophy.
- Communication with the surgeon, laboratory and patient to obtain predictable results.
- Laboratory techniques and procedures.
- Surgical considerations.

**MODULE I - Lecture**

From Overdentures to Full-Mouth Reconstruction.
- Surgical considerations.
- Laboratory techniques and procedures.
- Provisionalization: fixed or removable?
- Transitional implants to support provisional restorations.
- The conversion prosthesis as a treatment philosophy.
- Communication with the surgeon, laboratory and patient to obtain predictable results.
- Laboratory techniques and procedures.
- Surgical considerations.

**MODULE II - Lecture**

Fixed Prostheses Designs and Treatment Planning.
- Prosthodontic and surgical considerations.
- Establishment of occlusal vertical dimension, centric relation, esthetics and phonetics.
- Prosthesis design for fixed implant supported reconstruction.
- Surgical considerations.

**MODULE III - Hands-On Workshop (Limited Attendance)**

Conversion of Complete Dentures to Fixed Implant Restorations in One Clinical Visit.
- Conversion of complete dentures to fixed implant restorations in one clinical visit.
- Laboratory technicians, dental assistants and treatment coordinators who would like to learn about this treatment modality, to be able to present this option to patients and collaborate as part of the dental implant team.

This course is recommended for:
- Restorative dentists, prosthodontists, periodontists and oral surgeons who would like to be exposed to state-of-the-art aesthetic fixed implant reconstruction of the edentulous patient.
- Laboratory technicians, dental assistants and treatment coordinators who would like to learn about this treatment modality, to be able to present this option to patients and collaborate as part of the dental implant team.

- Module II: Lecture (Saturday, March 23, 2013)
  - Before February 15, 2013: Dentist $295; Auxiliary $225
  - After February 15, 2013: Dentist $375; Auxiliary $265

- Module III: Hands-On (Sunday, March 24, 2013)
  - Includes free implant reconstruction model - a $595 value
  - Before February 15, 2013: $1,875
  - After February 15, 2013: $1,995

**Faculty**

**Harel Simon, DMD**

Dr. Simon received his DMD degree from the Hebrew University, Jerusalem, Israel in 1991. He received his specialty certificate in advanced prosthodontics from UCLA School of Dentistry in 2000. Dr. Simon is an active member of various professional organizations including the American College of Prosthodontists, the Academy of Osseointegration and the Pacific Coast Society of Prosthodontists. He has conducted research, published and lectured nationally and internationally on esthetics and implant prosthodontics. He currently serves on the editorial review board of the Journal of Prosthetic Dentistry and Quintessence International. Dr. Simon practices in Beverly Hills, California and is a Clinical Associate Professor at Ostrow School of Dentistry of USC. Dr. Simon can be reached at hsimon@usc.edu.
