Module I: Friday, November 11, 2011
Module II: Saturday, November 12, 2011
Module III: Sunday, November 13, 2011
9:00am - 5:00pm

Comprehensive Course Series

CAD/CAM Restorations and Computer Guided Technology

Hands-On Workshop

★ Life-Long Tradition and Excellence ★
The use of Computer Aided Design and Computer Aided Manufacturing (CAD/CAM) has been incorporated into different disciplines of dentistry in the last decade. CAD/CAM implant frameworks designed by a technician on a computer and manufactured by a computer-operated facility to a high level of precision offer many benefits to implant dentistry. The use of computer-aided tomography, computer-assisted treatment planning and computer-guided surgery has been available for a variety of applications. Research and experience with this technology allows us to finely tune its use and understand its applications and limitations better than ever before. The use of these advanced technologies will be demonstrated and reviewed clinically. Advantages, disadvantages and limitations will be discussed to ensure maximum benefits of computer technology to a successful implant full-mouth reconstruction.

Richard M. Sullivan, DDS

Richard Sullivan is Vice President of Clinical Technologies at Nobel Biocare USA. He completed the two-year Harvard University Implant Dentistry Program in 1988 and provided implant placement, restoration and dental laboratory aspects of implant dentistry as a general dentist. Since 1990, he has worked with Nobel Biocare in several capacities, including a two-year relocation to Gothenburg, Sweden. Dr. Sullivan has provided osseointegration programs at universities and professional associations across the country. He has also published on the topics of esthetics, biomechanics and treatment of the fully edentulous patient. He is a Fellow of the Academy of Osseointegration and has served as Chairman of the Professional and Public Relations Committee.

Harel Simon, DMD (Course Director)

Harel Simon received his DMD degree from the Hebrew University, Jerusalem, Israel in 1991. He received his specialty certificate in advanced prosthodontics from UCLA, School of Dentistry in 2000. Dr. Simon is an active member of various professional organizations including the American College of Prosthodontists, the Academy of Osseointegration and the Pacific Coast Society of Prosthodontics. He has conducted research, published and lectured nationally and internationally on esthetics and implant prosthodontics. He currently serves on the editorial review board of the Journal of Prosthetic Dentistry and Quintessence International. Dr. Simon practices in Beverly Hills, California and is a Clinical Associate Professor at Herman Ostrow School of Dentistry of USC. Dr. Simon can be reached at haimss@usc.edu.

Peter K. Moy, DMD

Dr. Moy is Professor, Department Oral & Maxillofacial Surgery, Director of Implant Dentistry and Surgical Implant Center at UCLA and immediate past president of the Academy of Osseointegration. He received his dental degree from the University of Pittsburgh, a certificate in General Practice Residency from Queen’s Medical Center in Honolulu, Hawaii and a certificate in Oral and Maxillofacial Surgery from UCLA Hospital and Medical Center. Dr. Moy has lectured and published nationally and internationally on augmentation procedures in implant dentistry for the atrophic ridges. His recent textbook “Immediate Function & Esthetics in Implant Dentistry” by Quintessence was just translated to Japanese. He established and maintained his private practice in the West Coast Center for osseointegration in Brentwood, California.
