Esthetic Full-Mouth Implant Reconstruction Course Series

From Treatment Planning to Fixed Restoration

Hands-On Workshop

Module I - III:
Friday - Sunday, March 21 - 23, 2014
9:00 am - 5:00 pm

★ Life-Long Tradition and Excellence ★
Restoring the edentulous patient with an esthetic reconstruction may present numerous challenges to the clinician. The patient’s occlusal vertical dimension, centric relation, esthetics and phonetics need to be determined and maintained throughout the restorative process. With the advent of dental implants, there are various treatment options available today to address the patient’s esthetic and functional needs.

This course will discuss diagnosis and treatment planning for fixed implant supported reconstruction. A variety of treatment options and prosthesis designs will be introduced and the treatment sequence will be reviewed in a step-by-step simplified approach to provide a predictable outcome with esthetic implant reconstruction.

**SYNOPSIS**

**MODULE I - Lecture**

- From Overdentures to Full-Mouth Fixed
  - Fundamental treatment options for the edentulous patient.
  - Comprehensive diagnosis and treatment planning.
  - Individual attachments vs. bar overdentures.
  - Implant supported vs. implant-tissue supported overdentures.
  - Esthetic metal-resin and metal-ceramic fixed implant reconstruction.
  - Practical and time saving tips for full-mouth reconstruction.

**MODULE II - Lecture**

- Fixed Prostheses Designs and Treatment Planning
  - Simplicity in design: from one-piece complete arch to segmented design.
  - From screw retained to custom abutments and telescopic copings.
  - Esthetic full-mouth implant reconstruction in one visit?
  - Fixed implant reconstruction of patients with severely resorbed ridges and lack of lip support.
  - Surgical reconstruction to recreate lip support.
  - Management of complications.

**MODULE III - Hands-On Workshop (Limited Attendance)**

- Conversion of Complete Dentures to Fixed Implant Restorations in One Clinical Visit
  - Faculty: Harel Simon, DMD; Joseph Field, DDS; Sheryl Regalado, DMD; Take Katayama, CDT
  - In this unique and exclusive course, participants will receive models of completely edentulous arches with implants and corresponding complete dentures. Each participant will convert a complete denture to a fixed implant supported provisional restoration.
  - This technique is the core philosophy for a simplified approach for implant reconstruction. Mastering this technique simplifies the restorative sequence significantly and enhances the predictability of the treatment from an esthetic and functional point of view.
  - Upon completion, participants will receive these models for patient education and demonstration of full-mouth implant reconstruction.

**TOPICS TO BE COVERED**

- Diagnostic tools such as flangeless record base, wax-up, setup, intraoral mock-up and radiographic templates.
- Esthetic pontics: horizontally submerged & fused pontic designs.
- Gingiva-colored ceramics design and technique.
- Provisionalization: fixed or removable?
- Transitional implants to support provisional restorations.
- The conversion prosthesis as a treatment philosophy.
- Communication with the surgeon, laboratory and patient to obtain predictable results.
- Laboratory techniques and procedures.
- Surgical considerations.
**FACULTY**

**Harel Simon, DMD (Course Director)**

Dr. Simon received his DMD degree from Hebrew University, Jerusalem, Israel in 1991. He received his specialty certificate in advanced prosthodontics from UCLA School of Dentistry in 2000. Dr. Simon is an active member of various professional organizations including the American College of Prosthodontists, the Academy of Osseointegration and the Pacific Coast Society of Prosthodontics. He has conducted and published research and lectured nationally and internationally on esthetics and implant prosthodontics. He currently serves on the editorial review board of the Journal of Prosthetic Dentistry and Quintessence International. Dr. Simon practices in Beverly Hills, California and is a Clinical Associate Professor at the Ostrow School of Dentistry of USC. Dr. Simon can be reached at hsimon@usc.edu.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.
