Donor site bone harvesting
Abutment selection
Tunneling

Guided surgery
Immediate implant placement
CAD/CAM abutments

Provisionalization
Guided surgery
Sinus augmentation

Piezosurgery
Maxillary sinus lift
Flap design

Implant surgery and flap mgmt
Extraction socket bone grafting
Abutment selection

Virtual implant planning
Implant restoration
CT scan and imaging
** Speakers 

Baldwin Marchack, DDS, MBA (Symposium Chair) 
Dr. Marchack graduated from the Ostrow School of Dentistry of USC and received his MBA from UCLA. He is a Fellow of the American College of Dentists, International College of Dentists, and the Pierre Fauchard Academy. Dr. Marchack is an Honorary Member of the American College of Prosthodontists and Past President of the American Prosthodontic Society, the Pacific Coast Society for Prosthodontics, and the American Academy of Esthetic Dentistry. He is the Chair of the Editorial Council for the Journal of Prosthetic Dentistry, and serves on the Board of Councilors for the Ostrow School of Dentistry of USC. 

** Topic: Avoiding and Managing Complications Associated with Implant Therapy: A Restorative Perspective 

** Andrew YJ Kim, DDS, MS 
Dr. Kim is a graduate of the University of the Pacific Arthur A. Dugoni School of Dentistry. He completed a three-year advanced periodontics training and MS in Craniofacial Biology at Herman Ostrow School of Dentistry of USC. He practices dentistry in Singapore, published in multiple peer-reviewed journals, and lectured in the topics of aesthetics, bone regeneration, and implant dentistry. He is a faculty at the USC-Hong Kong and USC-Singapore Surgical and Restorative Implant Training Program. 

** Topic: Soft Tissue Surgical Considerations for Implant Dentistry 

** Edward Tam, BDS, MFGDP, MGDS, MGD 
Dr. Tam graduated from the Dental School at University of Dundee, Scotland in December 1987. While maintaining his own private practice in England for the following 10 years, he attained the higher qualifications of MFGDP(UK) from the Royal College of Surgeons of England and MGDS from The Royal College of Surgeons of Ireland. He also attended a year long training course on Dental Implants at Eastman Dental Institute in London, England between 1996-1997. He has recently completed the USC-Hong Kong Comprehensive Surgical and Restorative Implant Training Program at the University of Southern California, Ostrow School of Dentistry in January 2013. 

** Topic: Implant Dentistry in General Practice 

** Speakers: 
Dr. Baldwin Marchack (Course Director) 
Dr. Winston Chee, Dr. Andrew Kim, Dr. Bach Le, Dr. Christopher Marchack, Dr. Richard Sullivan, Dr. Homa Zadeh 

** Synopsis 

This symposium features a panel of international speakers from the US, Singapore and Hong Kong including Dr. Baldwin Marchack, Past President of the American Academy of Esthetic Dentistry and Chair of the Editorial Council for the Journal of Prosthetic Dentistry; Dr Andrew Kim, periodontist, who trained in the renowned Graduate Periodontology Program at the Ostrow School of Dentistry of USC; and Dr Edward Tam who trained in the UK and with the Herman Ostrow School of Dentistry of USC. The presentations feature treatment planning of esthetic implant surgery, complications related to restorative implant dentistry and integration of implant dentistry into a general practice. This is an educational opportunity not to be missed. There will also be a web-based greeting from Dr Avishai Sadan, Dean of the Ostrow School of Dentistry of USC. We hope to see you at the symposium.

** Educational Objectives 

** Avoiding and Managing Complications Associated with Implant Therapy: A Restorative Perspective 
- Causes of inflammation around implant restorations 
- Managing soft tissue prolapse 
- Managing soft tissue recession and hyperplasia 
- Implant overload: causes, outcomes, solutions 
- Implant Biomechanics 
- Restorative management with improper implant positions 

** Soft Tissue Surgical Considerations for Implant Dentistry 
- Discuss principles of soft tissue healing and management 
- Applications of flap management in implant therapy 
- Managing soft tissue volume with ridge augmentation techniques 
- Managing keratinized tissue in implant therapy 

** Implant Dentistry in General Practice 
- From diagnosis to implant surgery - my 15 year journey 
- What I have learned from the USC-HK implant program 
- How to integrate implant dentistry in a general practice 
- Case selection for the general dentist 

** USC Comprehensive Surgical and Restorative Implant Dentistry Training Program, Hong Kong 

COMING SOON! AUGUST 2013 - JANUARY 2014 

Implants can often serve as the most predictable, functional, esthetic and conservative therapeutic option for replacement of hopeless teeth. An array of surgical and prosthetic protocols have been proposed in implant dentistry; however, not all are supported by evidence-based documentation. The long-term success of implant-supported restorations requires a systematic approach to selection of appropriate diagnostic tools, risk assessment, treatment options, surgical and restorative protocols, as well as components and sequencing of care. This intense 15-day course consists of lectures, hands-on model workshops and live surgery and prosthetic demonstration. This educational experience will provide practical protocols which are beneficial for beginners, as well as experienced clinicians who would like to increase the predictability of their results and update their knowledge.

The USC Implant Training Program consists of the following modules: 
- Two 3-day sessions and one 2-day session in Hong Kong featuring lectures and hands-on workshops 
- One 2-day session in Singapore featuring lectures and hands-on workshops 
- Five days in Los Angeles: 
  - Two days of diagnosis & treatment planning of complex cases at Ostrow School of Dentistry of USC 
  - One day of lecture and live implant surgery demonstrations specific ally for the USC - Hong Kong course participants 
  - Two days of attendance of 39th Annual International Periodontal and Implant Symposium 
- Awards ceremony at USC and receipt of program certificate 

- Also in Los Angeles: 
  - Three days of optional hands-on cadaver workshops 

The main strength of this program is that the updated and predictable protocols will be presented in a systematic manner by world experts.

** Speakers: 
- Dr. Baldwin Marchack (Course Director) 
- Dr. Winston Chee, Dr. Andrew Kim, Dr. Bach Le, Dr. Christopher Marchack, Dr. Richard Sullivan, Dr. Homa Zadeh
