Advanced Soft Tissue and Bone Grafting with Cadaver Workshop

Lecture, Cadaver Workshop and Live Surgery Course
Herman Ostrow School of Dentistry of USC
NEW DATES: Friday - Sunday, June 26 - 28, 2015
8:00 am - 5:00 pm
Online registration available at www.uscdentalce.org

Registration Form

FIRST NAME __________________________
MIDDLE NAME ________________________
LAST NAME __________________________
TITLE __________________________
SPECIALTY __________________________
DL# __________________________
ADDRESS __________________________
CITY __________________________
STATE ________ ZIP __________
PHONE ( ) __________________________
FAX ( ) __________________________
E-MAIL __________________________
□ MASTERCARD □ VISA □ CHECK ENCLOSED
CARD NUMBER __________________________
EXPIRATION DATE __________________________
TOTAL PAYMENT $ __________________________
MEAL PREFERENCE: □ VEGETARIAN □ NO PREFERENCE

24 Hours of Continuing Education

Registration Fees
Before May 15, 2014
Dentist: $2,995
Auxiliary: $2,545

After May 15, 2014
Dentist: $3,295
Auxiliary: $2,800

Fees include course material, continental breakfast, lunch, and refreshments during breaks.

Please mail checks and make payable to:
Herman Ostrow
School of Dentistry of USC
Continuing Professional Education
925 W. 34th Street, Room 201J
Los Angeles, CA 90089-0641
Phone: 213.821.2127
Fax: 213.740.3973
E-mail: cedental@usc.edu
Website: www.uscdentalce.org
www.facebook.com/USCdentalCE

Refunds are granted only if a written cancellation notification is received at least 21 days before the course. 50% of the tuition minus processing fee will be refunded if cancellation occurs within 14 days before the course. No refund is granted afterwards. A $75 fee is withheld for processing. For additional registrations, xerox this form and send.

Upcoming Courses

INTERMEDIATE DENTAL IMPLANT RESTORATIVE PRINCIPLES, PROCEDURES AND PROTOCOLS
Part I - Lecture: Friday, April 3, 2015
Part II - Lecture, Demonstration and Hands-On: Saturday, April 4, 2015

COMMON ORAL LESIONS: SOFT AND HARD TISSUE DISEASES
Friday, April 10, 2015

SURGICAL AND PERIODONTAL PERSPECTIVES ON IMPLANT TREATMENT PLANNING
Friday, April 17, 2015

DELTA DENTAL: MULTIDISCIPLINARY APPROACHES TO ACHIEVE ORAL HEALTH, FUNCTION AND ESTHETICS
Friday, April 24, 2015

BASIC PROTOCOLS IN BONE AND SOFT TISSUE GRAFTING IN IMPLANT THERAPY
Friday - Sunday, May 1 - 3, 2015

LEARNING IMPLANT DENTISTRY FOR THE RESTORATIVE DENTIST: PART II
Saturday, May 9, 2015

COMPLICATIONS OF IMPLANT THERAPY
Saturday, May 16, 2015

COMPREHENSIVE PERIODONTAL SURGERY: ESTHETIC AND FUNCTIONAL PROCEDURES FOR THE GENERAL PRACTITIONER
Pre-Course Lecture: Thursday, May 28, 2015
Module I - Lecture & Workshop: Friday, May 29, 2015

ENDODONTICS FROM A TO Z: HANDS-ON WORKSHOP FOR THE GENERAL PRACTITIONER
Friday - Sunday, June 12 - 14, 2015
Friday - Sunday, June 26 - 28, 2015

ADVANCED RESTORATIVE OPTIONS WITH DENTAL IMPLANTS FOR FULLY EDENTULOUS ARCHES
Part I - Lecture: Friday, June 12, 2015
Part II - Lecture, Demonstration, and Hands-On: Saturday, June 13, 2015

3 + 1 Free CE Program
The More You Learn, the More You Earn!
Take any 3 CE courses between January and December 2015 and receive another course for FREE.

ADVANCED SOFT TISSUE AND BONE GRAFTING WITH CADAVER WORKSHOP
Lecture, Cadaver Workshop and Live Surgery Course
Herman Ostrow School of Dentistry of USC
NEW DATES: Friday - Sunday, June 26 - 28, 2015
8:00 am - 5:00 pm

• Lectures
• Hand-On Workshop
• Live Sinus Augmentation, Implant Placement and Soft Tissue Graft Surgeries

★ Life-Long Tradition and Excellence ★
Handson model and cadaver workshop:
- Lateral window and crestal osteotomy sinus augmentation
- Flap design and suturing
- Harvesting autogenous block and particulate bone
- Guided bone regeneration (GBR)
- Soft tissue augmentation around implants (VISTA)
- Harvesting soft tissue from palate and tuberosity
- Piezosurgery techniques

Live surgery demonstration:
- Lateral window and crestal osteotomy sinus augmentation
- Implant placement
- Vestibular Incision Subperiosteal Tunnel Access (VISTA) for soft tissue augmentation
- Guided bone regeneration (GBR)

“This course met my expectations and I will recommend this to my colleagues. Dr. Zadeh went above and beyond what I expected. All the speakers gave pertinent and useful information.”
- Jeffrey Hoy, Torrance, CA

### Speakers

**Homayoun H. Zadeh, DDS, PhD (Course Director)**

Dr. Zadeh is Associate Professor and Director of the post-doctoral periodontology program at the University of Southern California and a Diplomat of the American Board of Periodontology. Dr. Zadeh directs the Laboratory for Immunoregulation and Tissue Engineering (LITE) at USC, dedicated to studying basic mechanisms to regulate bone and tissue regeneration/destruction under health/disease states, as well as conducting clinical trials of dental implant outcomes. His clinical research interests involve studies on minimally-invasive surgery and tissue engineering. He maintains a part-time private practice limited to Periodontology and Implants in Southern California.

**Stephen Wallace, DDS**

Dr. Wallace is a graduate of Boston University School of Graduate Dentistry with a certificate in Periodontics. He is Associate Professor at the New York University Department of Implant Dentistry and a Diplomat of the International Congress of Oral Implantology and a Fellow of the Academy of Osseointegration. He lectures in the United States and abroad on dental implantology and periodontics. He is the author of journal articles and textbook chapters on implantology and co-editor of sinus elevation textbook released in Italy. Dr. Wallace maintains a private practice limited to Periodontics in Waterbury, CT.

### Topics to be discussed:

- Selection and sequencing of implant site development techniques
- Flap design principles
- Suturing material and techniques
- Selection of bone graft material
- Selection of barrier membranes
- Sinus augmentation rationale and techniques
- Lateral and crestal sinus augmentation
- 3D horizontal and vertical ridge augmentation
- Guided bone regeneration
- Piezosurgery techniques
- Methods of harvesting autogenous bone
- Soft tissue augmentation around implants
- VISTA for ridge augmentation in the esthetic zone
- Selection of material for socket tissue augmentation
- Diagnostic tools: CT and cone beam imaging, interactive imaging and scan prosthesis
- Computer-assisted implant positioning
- Minimally invasive tooth extraction
- Ridge preservation and augmentation

### Synopsis

Bone and soft tissue augmentation is frequently required for esthetic and functional reconstruction of patients. In order to achieve predictable outcomes of the regeneration, the methods have to be rooted in biologic principles supported by scientific evidence. This intense 3-day course is presented by two world-renown experts in the field of tissue regeneration, who derive from their vast experiences, as well as the scientific evidence to provide the most up-to-date and predictable protocols for bone and soft tissue augmentation. The course uses three methods to ensure in-depth learning by participants: 1) lecture, describing the biologic principles, as well as through clinical case presentation; 2) live surgery to demonstrate the most important protocols on patients, so that the participants have an opportunity to observe and interact during surgery; 3) cadaver workshop to allow participants to perform soft tissue and bone augmentation on human specimens. The availability of human specimens is the most effective method of learning advanced surgical procedures. Cone beam CT scan will be available for all cadavers in order for the participants to review the pertinent anatomic landmarks with the faculty and to plan for surgical procedures.
