Successful Management of Prosthetic Implant Complications

Module I - II:
Friday - Saturday, March 3 - 4, 2017
9:00am - 5:00pm

Hands-On Workshop
The introduction of dental implants has revolutionized dentistry, offering patients treatment that has not been possible before. Every treatment modality may encounter complications and implant dentistry is not different in this regard. It is therefore essential to be prepared for these complications and be able to manage them successfully once they occur. While there is no substitute for clinical experience, exposure to a variety of complication scenarios along with their appropriate remedies and preventative measures will render the clinician prepared when these inevitably occur. This lecture and hands-on course will review a variety of complications, offer a thorough analysis and demonstrate their successful management. In addition, participants will also learn how to prevent these complications from occurring.

**SYNOPSIS**

This course is a must for every implant practitioner - be prepared!

**MODULE I - Lecture**
- Loose implant restorations: differential diagnosis & treatment
- Damaged & fractured screws, abutments & implants
- Identification of implants
- Management of existing implants of unknown origin
- Esthetic, phonetic and functional complications
- Complications during impressions and laboratory procedures
- Implants and orthodontics conflicts
- Miscommunication between patient, laboratory & dentist
- Protocols to resolve implant complications
- Financial considerations of complications

**MODULE II - Hands-On Workshop (Limited Attendance)**
Implant Dentistry Emergencies
Faculty: Dr. Harel Simon, Dr. Joseph Field, Take Katayama, CDT

During this unique workshop, participants will use simulation models and encounter different complication scenarios. Participants will learn to address these complications successfully and will gain experience in situations such as repeated screw loosening, retrieving fractured screws and managing damaged implants, among other scenarios.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.
This course is recommended for:

- Restorative dentists, prosthodontists, periodontists, oral surgeons and any clinicians who work with dental implants.

- Laboratory technicians, dental assistants and treatment coordinators who need to be involved in different aspects of dental implant therapy as part of the dental implant team.

Harel Simon, DMD
Dr. Harel Simon received his DMD degree from the Hebrew University, Jerusalem, Israel and his specialty certificate in advanced prosthodontics from UCLA School of Dentistry. Dr. Simon has conducted research, published and lectured nationally and internationally on esthetics and implant prosthodontics. He has been a featured speaker at the Academy of Osseointegration, Academy of Prosthodontics, American College of Prosthodontists, American Academy of Fixed Prosthodontics and the Pacific Coast Society of Prosthodontics. Dr. Simon has co-authored the 2nd edition of the bestseller book Dental Implant Complications (Wiley-Blackwell). He currently serves on the editorial review board of various scientific publications including the Journal of Prosthetic Dentistry and Quintessence International. Dr. Simon practices in Beverly Hills, California and is a clinical associate professor at the Ostrow School of Dentistry of University of Southern California. Dr. Simon can be reached at hsimon@usc.edu.
