Implant Therapy in Compromised Sites

USC School of Dentistry
Friday, June 2, 2006, 8:00 a.m.- 5:00 p.m.
Saturday, June 3, 2006, 8:00 a.m. - 4:00 p.m.
Sunday, June 4, 2006, 8:00 a.m. - 1:00 p.m.
Online registration at www.uscdentalce.org

Refunds are granted only if a written cancellation notification is received at least 21 days before the course. 50% of the tuition fee will be refunded if cancellation occurs within 14 days before this course. No refund is granted afterwards. A $50 fee is withheld for processing. For additional registrations, xerox this form and send.

USC School of Dentistry is an ADA CERP and AGD recognized provider

Upcoming Events

UPDATE ON ESTHETIC RESTORATIVE DENTISTRY
Friday, March 31, 2006

DENTAL DETECTIVES:
FORENSICS AND THE DENTAL TEAM
Saturday, April 1, 2006

COMMON ORAL LESIONS WORKSHOP 2: UPDATE IN EARLY ORAL CANCER AND PRECANCER DETECTION
Saturday, April 1, 2006

OBSTRUCTIVE SLEEP APNEA, SNORING AND DENTAL ADVANCEMENT
Friday - Saturday, April 7 - 8, 2006

CRUISE TRAVEL AND LEARN PROGRAM:
MASTERING BONE GRAFTING FOR IMPLANT PLACEMENT
Sunday - Sunday, April 9 - 16, 2006

IMPLANT THERAPY IN THE ESTHETIC ZONE
Friday - Sunday, April 21 - 23, 2006

MAKING SENSE OUT OF REMOVABLE PARTIAL DENTURE DESIGN
Saturday, April 22, 2006

USC ESTHETIC DENTISTRY CONTINUUM 2006
Friday - Sunday, May 5 - 7, 2006
Friday - Sunday, June 30 - July 2, 2006
Friday - Sunday, July 21 - 23, 2006

MODERN HYPNOSIS FOR 21ST CENTURY DENTISTS
Saturday - Sunday, May 20 - 21, 2006

PHYSICAL EVALUATION
Wednesday, May 24, 2006

EMERGENCY MEDICINE
Thursday, May 25, 2006

MONITORING AND CLINICAL EMERGENCY MEDICINE
Friday, May 26, 2006

COMMON ORAL LESIONS WORKSHOP 3:

USC SCHOOL OF DENTISTRY

IMPLANT THERAPY IN COMPROMISED SITES

Lectures
★ Hands-on workshops on implant surgery and prosthetics
★ Live surgery and restorative case demonstrations

USC School of Dentistry
Friday, June 2, 2006, 8:00 a.m.- 5:00 p.m.
Saturday, June 3, 2006, 8:00 a.m. - 4:00 p.m.
Sunday, June 4, 2006, 8:00 a.m. - 1:00 p.m.
The success of dental implants depends on their placement in bone of adequate density and volume in order to achieve primary stability. However, there is usually at least some degree of atrophy in most implant sites due to post-extraction remodeling or because of pathologic conditions. There has been a gradual shift in paradigm from merely achieving successful osseointegration to achieving final restorative outcomes that mimic natural dentition and their surrounding oral tissues. These objectives have been materialized by advancements in surgical techniques, as well as availability of biomaterials to enable predictable regeneration or oral hard and soft tissues. This course will review the biological fundamentals, as well as the clinical surgical and restorative techniques involved in treating patients with compromised hard and soft tissues.

This course is recommended for:
- Surgical specialists and restorative dentists who would like to acquire a more in-depth and comprehensive understanding, as well as practical skills to achieve predictable treatment outcome in patients with compromised bone or soft tissues, as well as in management of complex prosthetic treatment plans
- Allied professionals (laboratory technicians, dental hygienists and dental assistants) who participate as members of the implant therapy team and would like to be more effective in their functions by enhancing their fundamental and practical knowledge

Topics to be covered:
- Reconstruction of prosthetically and anatomically compromised patients
- Selection and sequencing of implant site development techniques
- Rationale and techniques for sinus augmentation
- Horizontal ridge augmentation
- Vertical ridge augmentation
- Distraction Osteogenesis

- Mandibular block autografting
- Onlay block grafts rationale and techniques
- Guided bone regeneration
- Soft tissue augmentation around implants
- Immediate loading
- Prosthetic options for complex cases
- Diagnostic tools: CT imaging, surgical guide
- Computer-assisted implant positioning
- Orthodontic therapy for site development
- Minimally invasive tooth extraction
- Socket preservation and augmentation
- Immediate implant placement vs. staged implant placement
- Minimally invasive implant placement
- Immediate vs. delayed implant loading
- Implant impression techniques
- Provisional placement: immediate vs. staged
- Laboratory techniques and procedures

Hands-On Workshop
- Lateral window sinus augmentation
- Donor graft harvesting from ramus and symphysis
- Recipient site preparation and block graft fixation
- Guided bone regeneration

Live Surgery Demonstration
- Implant placement
- Bone and soft tissue grafting around implant sites

* This course is suitable for clinicians with intermediate or advanced experience in implant dentistry.
