Learning Implant Dentistry for the Restorative Dentist
In-Person Lectures or Live Webinar

Herman Ostrow School of Dentistry of USC
Part I - Saturday, February 3, 2018
Part II - Saturday, April 7, 2018

★ Life-Long Tradition and Excellence ★
Successful implant osseointegration is well documented over the past forty years. In this course, participants will learn the most predictable manner to diagnose and treat patients presenting missing teeth with dental implants and their restoration. Aspects of treatment planning will be discussed and conventional dentistry vs implant dentistry will be compared. Participants will become knowledgeable about CT scan, radiographic and surgical guides, implant components, implant provisional restorations and screw retained and cement retained restoration.

Part I is designed for those that wish to begin implant treatment for their patients and those that would like a better basic understanding of dental implants.

Part II of “Learning Implant Dentistry” is designed for the dentist who have some experience with implant dentistry and would like to improve their knowledge and skill with implant treatment planning, soft tissue manipulation, and final implant restorations. Single and multiple unit restorations will be discussed along with treatment planning implants and natural teeth for optimum results. The advantages and disadvantages of Implant impression techniques will be presented so that the practitioner can become confident with any impression technique. Cement retained vs. Screw retained implant restorations will be presented and recommendations will be given for various situations.

Part I*: February 3, 2018

Topics to be discussed:
- Implant Introduction- history and types

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.

* Part I is intended for beginners with limited implant knowledge and whose goal is to become familiar with the procedures of Restorative Implant Dentistry.

** Part II is designed for those who wish to have improved comprehension of implant treatment for their patients. Part I attendance is highly recommended prior to attending Part II.
