Refunds are granted only if a written cancellation notification is received at least 21 days before the course. 50% of the tuition minus processing fee will be refunded if cancellation occurs within 14 days before the course. No refund is granted afterwards. A $60 fee is withheld for processing. For additional registrations, xerox this form and send.
Dr. Saunders is Professor of Clinical Dentistry, Division of Primary Oral Health Care, USC School of Dentistry. He spent twenty-four years actively practicing and teaching prosthodontics and maxillofacial prosthetics in the United Stated Air Force. He is a Diplomate of the American Board of Prosthodontics, a Fellow of the American College of Dentists, the International College of Dentists, and a Fellow and Past-President of the American Academy of Maxillofacial Prosthetics.

Upon completion of this course participants should be able to:

- Recognize the critical importance of patient examination
- Understand the importance of proper case selection
- Identify multiple clinical factors assisting in removable partial denture design
- Be familiar with a variety of removable partial denture design approaches
- Appreciate that there is more than one design concept suitable for any given situation
- Recognize that no removable partial denture is the best solution for every case

In this lecture, Dr. Saunders will review treatment planning guidelines as well as principles of design for removable partial dentures. Participants will have the opportunity to review a patient case for removable partial denture and assist in the design process, applying the principles discussed by Dr. Saunders.

Testimonials:

“Great speaker, very energetic and no nonsense.”

“Excellent, inspiring, well worth it!”
