The More You Learn, The More You Earn!
FACULTY

Ilan Rotstein, DDS (Course Director)
Professor and Chair of the Division of Endodontics, Oral & Maxillofacial Surgery and Orthodontics, Associate Dean of Continuing Education at the Herman Ostrow School of Dentistry of USC, Los Angeles.

Thomas Levy, DDS, MS (Lab Director)
Associate Professor of Clinical Endodontics, Division of Endodontics, Oral & Maxillofacial Surgery and Orthodontics at the Herman Ostrow School of Dentistry of USC. Dr. Levy practiced endodontics for 24 years in Stockton, California.

Yaara Berdan, DDS
Clinical Assistant Professor of Endodontics, Division of Endodontics, Oral & Maxillofacial Surgery and Orthodontics at the Herman Ostrow School of Dentistry of USC. Dr. Berdan practiced endodontics for 21 years in Huntington Beach, California.

Daniel Schechter, DDS
Assistant Professor of Clinical Endodontics, Division of Endodontics, Oral & Maxillofacial Surgery and Orthodontics at the Herman Ostrow School of Dentistry of USC. Dr. Schechter practiced endodontics for 21 years in Huntington Beach, California.

Louis Schwarzbach, DMD
Clinical Assistant Professor of Endodontics, Division of Endodontics, Oral & Maxillofacial Surgery and Orthodontics at the Herman Ostrow School of Dentistry of USC. Dr. Schwarzbach maintains a full-time private endodontic specialty practice in Northridge, California.

Anthony Tran, DDS
Clinical Assistant Professor of Endodontics, Division of Endodontics, Oral & Maxillofacial Surgery and Orthodontics at the Herman Ostrow School of Dentistry of USC. Dr. Tran maintains a private endodontic practice in Fresno, California.

SYNOPSIS

Molar endodontics often present challenges to the clinician. These may include difficulty in isolation and access, negotiation of curved and narrow root canals, calcified canals, difficulty in canal obturation, and managing anatomical variations. However, many advances in technology, materials and equipment have made it possible today to efficiently perform successful molar endodontic treatment with more precision and predictable results.

This two-day intensive course includes lectures and hands-on workshops and is specially designed for General Dentists who wish to advance their clinical skills when performing molar endodontics. Participants will learn how to perform efficient endodontic access, clean and shape the root canal system and finally obturate in a predictable manner. Participants will also perform endodontic treatment from start to finish in real maxillary and mandibular molar teeth. Without a doubt, this course will help you master molar endodontics.

Limited Time Offer!
Participants will be entered in a special raffle to win a copy of the world renowned textbook, Ingle’s Endodontics - 6th Edition, a $150 value! Winner will be chosen in a random drawing at the first day of the course.

Topics to be discussed:
• Endodontic anatomy and morphology of molar teeth
• Modern principles of endodontic access
• Root canal length determination - radiographic and electronic
• Cleaning and shaping of molar root canals
• Nickel Titanium rotary instrumentation
• Procedural errors and their prevention
• Root canal obturation
• Case selection for molar endodontics

Upon Completion of the Course Participants Should Be Able To:
• Enhance their knowledge of the clinical concepts of molar endodontics
• Successfully treat both upper and lower molar teeth
• Apply system-based approaches for treating endodontic cases
• Approach molar endodontic cases with more confidence and enjoy more predictable results
• Know when and what to refer
