University of Southern California Ostrow School of Dentistry is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

★ Life-Long Tradition and Excellence ★
Molar endodontics often present challenges to the clinician. These may include difficulty in isolation and access, negotiation of curved and narrow root canals, calcified canals, difficulty in canal obturation, and managing anatomical variations. However, many advances in technology, materials and equipment have made it possible today to efficiently perform successful molar endodontic treatment with more precision and predictable results.

This two-day intensive course includes lectures and hands-on workshops and is specially designed for General Dentists who wish to advance their clinical skills when performing molar endodontics. Participants will learn how to perform efficient endodontic access, clean and shape the root canal system and finally obturate in a predictable manner. Participants will also perform endodontic treatment from start to finish in real maxillary and mandibular molar teeth. Without a doubt, this course will help you master molar endodontics.

Limited Time Offer!
Participants will be entered in a special raffle to win a copy of the world renowned textbook, *Ingle’s Endodontics - 6th Edition*, a $150 value! Winner will be chosen in a random drawing at the first day of the course.
