Oral Surgery for the General Practitioner

Saturday, March 3, 2007 • 9:00 a.m. – 5:00 p.m.

LECTURE COURSE
7 Hours of Continuing Education

Dennis-Duke R. Yamashita
DDS, FACP, FICD
Clinical Professor, Division of Surgical Therapeutic and Bioengineering Sciences and Director, Oral and Maxillofacial Surgery, USC School of Dentistry and Los Angeles County Medical Center.

Bach Le, DDS, MD, FICD
Clinical Assistant Professor, Division of Surgical Therapeutic and Bioengineering Sciences and Assistant Director, Oral and Maxillofacial Surgery, USC School of Dentistry and Los Angeles County Medical Center. Dr. Le maintains a private practice in Whittier, California.

James P. McAndrews, DDS
Oral & Maxillofacial Surgeon and Assistant Clinical Professor, USC School of Dentistry. Attending staff at Los Angeles County Medical Center and attending staff at USC University Hospital. Dr. McAndrews maintains a private practice in Montebello and Downey, California.

Have you ever had a routine dental extraction that turns ugly? Don’t let minor complications such as broken root tips stump you! Learn how to manage oral surgery cases with confidence and minimal stress.

This all-day lecture course is designed for general dentists who want to expand their oral surgery experience and better understand and manage dento-alveolar surgical procedures. This comprehensive course will offer you, the general practitioner, an opportunity to better handle your extraction cases, manage complications and know what to avoid.

Upon completion of this course you will be able to:
- Perform pre-operative patient evaluation and assess difficult extractions
- Manage medically compromised patients
- Prescribe medications most commonly used for oral surgery
- Apply effective local anesthesia techniques
- Know how to use instrumentation for atraumatic extraction and dentoalveolar surgery
- Apply tissue management and flap designs for various surgical procedures
- Know principles of exodontia to effectively retrieve broken root tips
- Perform socket preservation (hard and soft tissue) for dental implants
- Manage the post-extraction site with interim provisional restorations to maintain tissue architecture
- Manage complications

Testimonials:
“The course was very informative and the speakers were excellent.”
“One of the very best!”
“Well worth the day.”
