Herman Ostrow School of Dentistry of USC is an ADA CERP and ACDE recognized provider

Herman Ostrow School of Dentistry of USC
Certification: Wednesday - Friday, November 17 - 19, 2010
PALS: Saturday - Sunday, November 20 - 21, 2010
8:00 a.m. - 5:00 p.m.
The focus of this course is sedation of the pediatric patient receiving dental care. The purpose is to prepare the participant to deliver safe and effective enteral (oral) moderate sedation to the patient under the age of 13 years. This course is designed to meet requirements for a pediatric enteral moderate sedation (OMS) permit in California and most other states.

**Major topics to be discussed during the three days of the course include:**
- the development of guidelines for pediatric OMS, physiology and psychology of the child, sedation techniques in children, including N₂O-O₂, intranasal, intravenous and general anesthesia, oral moderate sedation including pharmacology and protocols, monitoring and record keeping, physical evaluation, medically compromised and special needs patients, and management of unintended consequences (sedation failures and oversedation). Issues of sedation in adult patients will also be discussed.

*All doctors enrolling in this course are REQUIRED to become Pediatric Advanced Life Support (PALS) providers. The PALS course will be presented on Saturday and Sunday, November 20 - 21, 2010. Certification will be provided by Coleman Education Opportunities (CEO).*

**Upon completion of this course participants should be able to:**
- Know the anatomic and physiologic differences between the child and adult
- Describe the indications, contraindications, advantages and disadvantages of inhalation sedation with N₂O-O₂ in the pediatric patient
- Discuss the appropriate use of N₂O-O₂ in combination with oral sedation
- Know the indications, contraindications, advantages and disadvantages of oral moderate sedation in the pediatric patient
- Name 5 orally-administered CNS-depressants recommended for use in pediatric OMS
- Describe the pharmacologic actions of these 5 drugs on the CNS, respiratory system, and cardiovascular system
- Outline the protocol for a pediatric OMS appointment
- Determine the maximum recommended dosage of local anesthetic agents in pediatric dental patients
- Describe the monitors employed during pediatric OMS
- Describe the record keeping required for pediatric OMS
- List the criteria for discharge from the dental office of the pediatric patient receiving OMS
- Diagnose and manage oversedation and the unconscious patient
- Describe the ASA Physical Status Classification System giving examples of each category
- Diagnose and treat the medical emergency situations mandated by the Dental Board of California
- Describe and understand the use of each of the emergency drugs and supplies mandated by the Dental Board of California
- Use oral moderate sedation effectively and safely in the pediatric dental patient

---

**Stanley F. Malamed, DDS**

Dr. Malamed graduated from the New York University College of Dentistry in 1969. In 1973, he joined the faculty of the Herman Ostrow School of Dentistry of USC, where today he is Professor of Anesthesia and Medicine and a Diplomate of the American Dental Board of Anesthesiology. During his tenure at the University of Southern California, he has been a recipient of the Heidebrink Award (1996) from the American Dental Society of Anesthesiology and Horace Wells Award from the International Federation of Dental Anesthesia Societies (1997). Dr. Malamed has authored more than 135 scientific papers and 16 chapters in various medical and dental journals and textbooks in the areas of physical evaluation, emergency medicine, local anesthesia, sedation, and general textbooks. In his spare time, Dr. Malamed enjoys exercising vigorously and has maintained a healthy addiction to the New York Times crossword puzzle, since his freshman year at NYU.

**Ken Reed, DMD**

Dr. Reed is Clinical Associate Professor at the Oregon Health Sciences University School of Dentistry, Portland, Oregon and Assistant Director of Advanced Education in General Dentistry, Arizona Region, at the Luther Medical Center, New York. He obtained his D.M.D. from the Oregon Health Sciences University School of Dentistry in 1989 and his specialty certificate in Periodontology in 1991 from the same university. He is a Diplomate of the National Dental Board of Anesthesiology and a member of the Board of Directors of the American Dental Society of Anesthesiology. He is currently Chair of the Committee on Examinations of the American Dental Society of Anesthesiology and Chair of the Component Development of the same organization. Dr. Reed is a reviewer for several dental journals, and has lectured extensively on anesthesiology and related topics.
