Restorative Implant Dentistry for the General Dentist 2018

Before

After

Herman Ostrow School of Dentistry of USC

COURSE A: FEBRUARY 9 - 10, 2018
COURSE B: MAY 4 - 5, 2018
COURSE C: JUNE 8 - 9, 2018

Life-Long Tradition and Excellence
Patients today are increasingly aware of dental implants and are expecting more for esthetically and functionally pleasing restorations that mimic natural teeth. In order to be competitive, the general dentist today must be able to meet those expectations and patient’s restorative needs.

This 3 part lecture and hands-on course series – introductory, intermediate and advanced restorative principles and procedures for implants, will empower the practitioner to restore the majority of implant-related clinical situations. This course series will also enable you to work effectively and synergistically with other disciplines such as oral surgery, periodontics, orthodontics, prosthodontics and dental technology to deliver optimum care to the patient.

Please be cautioned about the potential risks of using limited knowledge when integrating new techniques into your practices.
COURSE A: FUNDAMENTAL PRINCIPLES OF RESTORATIVE IMPLANT DENTISTRY FOR THE SINGLE MISSING TOOTH
Dr. Baldwin Marchack
Friday, February 9, 2018. 8:00am – 5:00pm: Lecture Only
Saturday, February 10, 2018. 8:00am – 5:00pm: Lecture & Hands-On (Limited Attendance)
Herman Ostrow School of Dentistry of USC

SYNOPSIS
In this course, participants will gain proficiency in diagnosis and treatment planning for the single missing anterior or posterior tooth, and will master the restorative steps for single posterior implant and single anterior implant. Restorative decision making and execution will be transformed into a simple and easy process. Participants will also learn how to avoid and manage restorative complications. The lecture on day one will address all of the above topics. On day two, in addition to demonstrations by the instructor, participants will have the opportunity to participate in a hands-on workshop featuring impression-making techniques and fabricating provisional restorations, custom impression copings and custom abutments. This course will also address the trend to digital implant dentistry and how currently available digital workflows will fit into our everyday practice.

EDUCATION OBJECTIVES
DAY I - LECTURE ONLY:
Diagnosis and treatment planning
- Standard of care
- Indications and contraindications for dental implants
- Options for replacement of a single missing tooth
- CBCT scans
Implant prosthetics
- Cement vs. screw retained restorations
- Provisionalization
- Abutment selection
- prefabricated stock abutments
- custom computer designed abutments
- Impression techniques
- Intraoral scanners and how they fit in implant dentistry
- Biomechanics and occlusion

DAY II - LECTURE AND HANDS-ON:
Demonstrations: Instructor will demonstrate
- Fabrication of single unit provisional restoration
- Fabrication of custom impression copings
- Fabrication of custom abutments

Hands-On: Participants will have the opportunity to:
- Make abutment level and implant level impressions
- Attach abutments to implants
- Learn proper use of a torque wrench
- Fabricate single unit provisional restoration
- Fabricate a custom impression coping
- Fabricate a pattern for a custom abutment
- Observe and inspect implant scanbodies and CAD/CAM printed casts
- Observe and inspect provisional, abutments and restorations fabricated from digital intraoral scans

Who will benefit from attending this course:
- Dentists with limited implant knowledge
- Dentists with implant experience who want to be updated with the most current digital technologies
- Allied health professionals

TUITION BEFORE JAN 5, 2018
Lecture Only: Dentist $345
Lecture & Hands-On: $1,295

TUITION AFTER JAN 5, 2018
Lecture Only: Dentist $395
Lecture & Hands-On: $1,395
In this course, participants will gain confidence and proficiency in restoring any type of implant connection. Both internal and external connections will be discussed, and advantages and disadvantages of the various types of connections will be analyzed. Participants will also learn when certain connections are indicated or preferred and how to participate in the decision making process with the oral surgeon or periodontist. The management of implants from single unit to multiple units in the partially edentulous arch will be discussed. On day one, lectures will address all of the above topics. On day two, in addition to lectures and demonstrations by the instructor, participants will have the opportunity to participate in a hands-on workshop including impression-making techniques, fabricating custom impression copings, fabricating provisional restorations for different types of implant connections, and provisional restorations for multiple implants.

**EDUCATION OBJECTIVES**

**DAY I - LECTURE ONLY:**
- Diagnosis and treatment planning
- Different types of implant-abutment connections
  - External - hex
  - Internal - hex, trilobe, conical, conical with hex, and others
- Advantages and disadvantages
- Indications and contraindications for use
- Different brands and their connection types
- Multiple missing teeth
- Number of implants required to replace multiple missing teeth

**Implant prosthetics**
- Cement vs screw retained restorations
- Abutment selection
  - prefabricated stock abutments
  - custom computer designed abutments
- Engaging vs non-engaging
- Material selection, strength, indication
  - splint or individual
- Splinting at implant level
- Splinting at abutment level
- Splinting at the restoration level
- Abutment screws – different head-recess size/designs
- Provisionalization
- Impression techniques
- Biomechanics and occlusion
- Surgical guides

**DAY II - LECTURE AND HANDS-ON:**
- Demonstrations: Instructor will demonstrate
  - Fabrication of single unit provisional restoration using different implant connections
  - Fabrication of multiple unit provisional restoration
- Hands-On: Participants will have the opportunity to
  - Learn proper use of a torque driver
  - Make implant level impressions for different types of connections
  - Make accurate multiple unit impressions
  - Attach abutments to implants
  - Fabricate single unit provisional restoration using different connections
  - Fabricate multiple unit provisional restoration

Who will benefit from attending this course:
- Dentists with limited implant knowledge
- Practitioners with previous clinical implant experience
- Allied health professionals

**TUITION BEFORE APR 1, 2018**
- Lecture Only: Dentist $345
- Lecture & Hands-On: $1,295

**TUITION AFTER APR 1, 2018**
- Lecture Only: Dentist $395
- Lecture & Hands-On: $1,395
COURSE C: ADVANCED RESTORATIVE OPTIONS WITH DENTAL IMPLANTS FOR FULLY EDENTULOUS ARCHES
Dr. Baldwin Marchack & Dr. Christopher Marchack
Friday, June 8, 2018. 8:00am – 5:00pm: Lecture Only
Saturday, June 9, 2018. 8:00am – 5:00pm: Lecture & Hands-On
(Limited Attendance)
Herman Ostrow School of Dentistry of USC

SYNOPSIS
In this course, participants will gain confidence and proficiency in restoring most full arch implant supported situations. Various fixed and removable options will be presented. Both internal and external connections will be discussed, as well as the use of non-engaging multi-unit abutments. On day one, lectures will address all of the above topics. On day two, in addition to lectures and demonstrations by the instructors, participants will have the opportunity to participate in a hands-on workshop including techniques for accurate full arch implant impressions, fabricating provisional for fully edentulous arches, and learning how to assess the fit of full arch metal or zirconia bars and frameworks.

EDUCATION OBJECTIVES

DAY I - LECTURE ONLY:
Diagnosis and treatment planning
• Treatment planning for the fully edentulous maxilla and mandible
• Fixed and removable options
• Number of implants required to support different options
• Surgical guides for ideal placement
Implant prosthetics
• Fixed and removable restorations
• Provisionalization
• Impression techniques
• Biomechanics and occlusion
• Material choices

DAY II - LECTURE AND HANDS-ON:
Demonstrations: Instructor will demonstrate
• Fabrication of a fixed provisional restoration by converting an existing full denture
• How to try in full arch frameworks made of titanium or zirconia

Hands-On: Participants will have the opportunity to
• Fabricate a surgical guide by duplicating an existing full denture
• Make an accurate full arch implant impression
• Fabricate a fixed provisional restoration by converting an existing removable full denture
• Assess full arch titanium and zirconia frameworks for passive fit

Who will benefit from attending this course:
• Practitioners with previous clinical implant experience
• Practitioners with previous experience in fabricating full dentures
• Allied health professionals

TUITION BEFORE MAY 1, 2018
Lecture Only: Dentist $395
Lecture & Hands-On: $1,295

TUITION AFTER MAY 1, 2018
Lecture Only: Dentist $445
Lecture & Hands-On: $1,395
Baldwin W. Marchack, D.D.S., M.B.A.
Dr. Baldwin Marchack is a 1971 graduate of the Herman Ostrow School of Dentistry of USC. In 1989 he received his MBA from the Anderson Graduate School of Management at UCLA. Dr. Marchack is a Fellow of the American College of Dentists, a Fellow of the International College of Dentists, and a Fellow of the Pierre Fauchard Academy. He is a member of the Academy of Prosthodontics, the International College of Prosthodontists, the Academy of Osseointegration and the Newport Harbor Academy of Dentistry. He is past-president of the American Prosthodontic Society, past-president of the Pacific Coast Society for Prosthodontics, past-president of the American Academy of Esthetic Dentistry and past president of the Osseointegration Study Club of Southern California. Dr. Marchack was inducted as an Honorary Member of the American College of Prosthodontists at its annual meeting in 2012. He serves on the Board of Councilors at the Herman Ostrow School of Dentistry of USC, and is Adjunct Assistant Professor at Georgia Regents University, School of Dentistry. Dr. Marchack is currently the Chair of the Editorial Council for the Journal of Prosthetic Dentistry, and he maintains a private practice in Pasadena, California.

Christopher B. Marchack, D.D.S.
Dr. Christopher B. Marchack is a 1987 graduate of the University of the Pacific, School of Dentistry. He received his prosthodontic certificate, in 1992, from the University of Southern California. Dr. Marchack belongs to numerous professional organizations including the Pacific Coast Society of Prosthodontists, the Academy of Prosthodontics, the American College of Prosthodontists, the Academy of Osseointegration, the San Gabriel Valley Dental Implant Study Club, and the Southern California Osseointegration Study Club. He has written numerous articles in peer reviewed journals, related to restorative aspects of implant dentistry. Dr. Marchack is on the editorial review board of the Journal of Prosthetic Dentistry and the International Journal of Oral and Maxillofacial Implants. He has lectured nationally and internationally. Dr. Marchack has been interviewed on local and national television news programs pertaining to dental procedures. In 2008, Dr. Marchack was the recipient of the The Judson C. Hickey Scientific Writing Award, given by the Journal of Prosthetic Dentistry, for the best dental technique article for 2007. Currently, he has a full time practice, in Pasadena, California; is the founder and current director of the San Gabriel Valley Dental Implant Study Club; past co-director of the University of Southern California’s Odontic Seminar; Clinical Associate Professor at the University of Southern California, and Adjunct Assistant Professor at the University of Pennsylvania, School of Dental Medicine, department of Preventive and Restorative Sciences.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC, does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.

“A very complete course with excellent clinical information and hands-on experience along with his clinical support staff!”
- Dr. David Gisborne

“Very useful and practical information to help us be better dentists.”
- Dr. Burt Sodelman

“Great speaker. He made the whole course simple, easy to follow and implement. Decision tree was awesome. Hands-on part was very good.”
- Nathalie Selvanathan
