**Baldwin W. Marchack, D.D.S., M.B.A.**

Dr. Baldwin Marchack is a 1971 graduate of the Herman Ostrow School of Dentistry of USC. In 1989 he received his MBA from the Anderson Graduate School of Management at UCLA. He is a Fellow of the American College of Dentists, a Fellow of the International College of Dentists, and a Fellow of the Pierre Fouchard Academy. Dr. Marchack is a member of the Academy of Prosthodontics, the International College of Prosthodontists and the Academy of Osseointegration, and he is past-president of the American Prosthodontic Society, past-president of the Pacific Coast Society for Prosthodontics, past-president of the American Academy of Esthetic Dentistry, past-president of the International Federation of Esthetic Dentistry and past-president of the Osseointegration Study Club of Southern California. He is a former Examiner for the California State Board of Dental Examiners. Dr. Marchack is an Honorary Member of the American College of Prosthodontists. He serves on the Board of Councilors of the Herman Ostrow School of Dentistry of USC, and he is the Course Director for the USC Esthetic Dentistry Training Program in Hong Kong and course director for the USC Comprehensive Surgical and Restorative Implant Dentistry Training Program in Hong Kong. Dr. Marchack is currently the Chair of the Editorial Council for the Journal of Prosthetic Dentistry and maintains a private practice in Pasadena, California.

**Christopher B. Marchack, D.D.S.**

Dr. Christopher B. Marchack is a 1987 graduate of the University of the Pacific, School of Dentistry. He received his prosthodontic certificate in 1992, from the University of Southern California. Dr. Marchack belongs to numerous professional organizations including the Pacific Coast Society of Prosthodontists, the Academy of Prosthodontics, the American College of Prosthodontists, the Academy of Osseointegration, the San Gabriel Valley Dental Implant Study Club, and the Southern California Osseointegration Study Club. He has written numerous articles in peer reviewed journals related to restorative aspects of implant dentistry. Dr. Marchack is on the editorial review board of the Journal of Prosthetic Dentistry and the International Journal of Oral and Maxillofacial Implants. He has lectured nationally and internationally. Dr. Marchack has been interviewed on local and national television news programs pertaining to dental procedures. In 2008, Dr. Marchack was the recipient of the The Justin C. Hickey Scientific Writing Award, given by the Journal of Prosthetic Dentistry, for the best dental technique article for 2007. Currently, he has a full time practice, in Pasadena, California; is the founder and current director of the San Gabriel Valley Dental Implant Study Club; past co-director of the University of Southern California’s Odontic Seminar; Clinical Associate Professor at the University of Southern California, and Adjunct Assistant Professor at the University of Pennsylvania, School of Dental Medicine, department of Preventive and Restorative Sciences.

“A very complete course with excellent clinical information and hands-on experience along with his clinical support staff!”

- Dr. David Glass}

“Very useful and practical information to help us be better dentists.”

- Dr. Burt Sodelman

“Great speaker. He made the whole course simple, easy to follow and implement. Decision tree was awesome. Hands-on part was very good.”

- Nathalie Selvanathan

In this course, participants will gain confidence and proficiency in restoring any type of implant connection. Both internal and external connections will be covered, and advantages and disadvantages of the various types of connections will be analyzed. Participants will also learn when certain connections are indicated or preferred and how to participate in the decision-making process with the oral surgeon or periodontist. The management of implants from single units to multiple units in the partially edentulous arch will be discussed. On day one, the focus will be lectureonly. The presentation will begin with diagnosis and treatment planning for the single missing tooth and will address different types of implant connections and restorative options for these various connections. The lecture will continue with treatment planning of multiple implants for the partially edentulous arch. The rationale for deciding whether to splint multiple implants or whether to keep them individual will be discussed. Different options for splinting will be presented. On day two, the hands-on workshop will consist of exercises to allow participants to recognize the difference between all types of implant connections and become familiar with restorative procedures such as impression taking, fabrication of provisional restorations and fastening of definitive abutments and final restorations for these different connections. Digital procedures for restorative implant dentistry will be introduced and digital workflows will be discussed. Also on day two, the workshop will include accurate impression-making techniques for multiple implants, and fabricating provisional restorations for single and multiple implants using different techniques.

In this course, participants will gain confidence and proficiency in restoring most full arch implant supported situations. Various fixed and removable options will be presented. Both internal and external connections will be discussed, as well as the use of non-engagement and engagement abutments. On day one, lectures will address all of the above topics. On day two, in addition to lectures and demonstrations by the instructors, participants will have the opportunity to participate in a hands-on workshop including techniques for accurate full arch implant impressions, fabricating provisional for fully edentulous arches, and learning how to assess the fit of full arch metal or zirconia bars and frameworks.

Day 1 - Lecture Only:
- Treatment planning for the fully edentulous maxilla and mandible
- Indications and contraindications
- Types of implant connections, internal & external, passive & non-passive
- Options for replacement of single missing tooth
- Options for replacement of multiple missing teeth
- Advantages and disadvantages

Day 2 - Lecture & Hands-On:
- Learn proper use of a torque driver
- Attach abutments to different types of implant connections
- Fabricate single unit provisional restorations for different types of implant connections
- Fabricate splinted provisional restorations for multiple implant units using different techniques
- Make implant level impressions for different types of connections
- Fabricate a custom implant coping
- Make accurate multiple unit impressions

Who will benefit from attending this course:
- Practitioners with previous implant experience
- Practitioners with previous experience in fabricating full dentures
- Allied health professionals

Please be cautioned about the potential risks of using limited knowledge when integrating new techniques into your practices.
