Saturday - Sunday, December 10 - 11, 2016

Safe, Accurate and Predictable
Implant Surgery - Part I
Dentists often face challenges in implant surgery that may lead to various complications and undesired outcomes. Implant malpositioning, soft and hard tissue damage and infections are some of the problems that can occur. Once experienced, it may cause dentists to discontinue implant treatment.

This one-day online training will teach you a safe, accurate and predictable method to place implants. Dr. Simon will broadcast this live training and share clinical advice, tips and guidelines that will allow you to replicate his favorable results in your practice.

The training is geared towards any dentist or specialist interested in performing implant surgery in a private practice setting with confidence, higher success rate and less complications.

Dr. Simon will discuss various clinical situations indicated for implant replacement of single and multiple teeth in the esthetic and non-esthetic zones. All procedures will be reviewed step-by-step, from initial presentation to final completion and with clear demonstration and explanation of each step.

This webinar is fully live and interactive and allows participants to interact with Dr. Simon and other doctors from around the world through a chat feature.

Attending this webinar is possible on a home desktop, laptop, smart phone and tablet everywhere in world. All that is necessary is an uninterrupted internet connection and a desire to expand your knowledge in implant surgery.

This unique experience will allow you to attend from the comfort of your home, or dental practice, while actively participating and addressing real-life dental issues and cases from your office. Dr. Simon will share his best tips and tricks with emphasis on safety, predictability and accuracy in implant surgery.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.

REGISTRATION FEE
Live Online Training Program
Before October 15, 2016: $175
