Supra-gingival Dentistry Workshop:
Easy, Predictable Porcelain Veneers, Onlays, and Full Crowns

Upon completion of this course participants should:

- Understand the benefits of supra-gingival dentistry by observing live preparation and cementation procedures for non-metal veneers.
- Know simple and predictable tooth preparation techniques specific to supra-gingival dentistry and perform multiple veneer, onlay and crown preparations in a simulator.
- Be able to use a predictable impression technique; never do a retake!
- Know how to choose the correct type of restorative material and translucency.
- Understand which bonding systems and cements are most esthetically appropriate to achieve good margin blending.
- Know how to perform sensitive-free and easy cementation techniques to both anterior veneers and posterior onlays.

Boris Keselbrener, DDS
Dr. Keselbrener is Assistant Professor of Clinical Dentistry in the Division of Restorative Sciences at the Herman Ostrow School of Dentistry of USC. He is the Course Director for the ASPID preclinical fixed prosthodontics and Co-Director of operative/fixed preclinical courses, as well as instructor in occlusion and morphology courses.
