To consistently achieve outstanding esthetic results, it is imperative to have a thorough understanding of the 25 parameters of dental-facial esthetics, gingival esthetics, and the position of the dental structures in relation to the rest of the face. This will aid to perform excellent Dento-Facial esthetic diagnosis, by implementing a methodic and incremental occlusal diagnosis for every patient and understanding the 7 signs and symptoms of occlusal disease, and how it impacts the longevity of your restorations. The Occlusal Disease Diagnosis System is a methodic and yet practical system to diagnose and then treat occlusal disease. Furthermore, achieving consistent patient satisfaction also requires excellent communication with the patients to understand their unique esthetic perspective and goals and implement a system, record this information and blend it with the clinician’s esthetic preferences and goals. We cannot do it alone! By utilizing highly trained and motivated dental team, we can improve our communication with patients, and simplify the complex and time consuming diagnostic process, thereby becoming more efficient and patient-centered. This ultimately will allow for the delivery of better dental care.

This practical course will present a method to increase the effectiveness and success of your esthetic diagnostic and multidisciplinary treatment planning by utilizing a team driven approach and the “Dento-facial diagnostic system”. Principles of esthetic diagnosis, treatment planning, team-driven patient education, patient motivation and team building will be discussed. This course will provide you with practical strategies and techniques that are easy to implement in a busy private practice, and will improve treatment acceptance and patient satisfaction.
