Saturday, October 25, 2014

EMERGING DISEASES, INFECTION CONTROL AND CALIFORNIA DENTAL PRACTICE ACT
Saturday, October 25, 2014

PEDiATRIC ORAL SEDATION CERTIFICATION PROGRAM
Wednesday - Sunday, October 29 - November 2, 2014

3 + 1 Free CE Program

The More You Learn, The More You Earn!
Take any 3 CE courses between January and December 2014 and receive another course for FREE.

Registration Fees
Before November 20, 2014
Dentist: $1,495
Auxiliary: $795

After November 20, 2014
Dentist: $1,695
Auxiliary: $895

Fees include course material, continental breakfast, lunch, and refreshments during breaks.

Refunds are granted only if a written cancellation notification is received at least 21 days before the course. 50% of the tuition minus processing fee will be refunded if cancellation occurs within 14 days before the course. No refund is granted afterwards. A $75 fee is withheld for processing. For additional registrations, xerox this form and send.
According to CDC data, approximately one-third of Americans over the age 65 are edentulous and their number is projected to increase over the next twenty years. Implant-supported prostheses have been documented to improve the quality of life of patients and are gaining acceptance as the standard of care. A variety of treatment options exist for edentulous patients. Implant supported prostheses can solve many of the problems experienced by patients with complete dentures. This intensive 2-day course brings together surgical and prosthodontic experts for a systematic presentation of therapeutic options for edentulous patient. The format of this course consists of lecture, hands-on workshop, and live surgery demonstration.

Topics to be discussed:
Diagnosis and treatment planning
- Diagnostic tools: radiographs, CT scan, cone beam, interactive imaging
- Treatment planning and case selection:
  - Implant-supported overdenture vs. fixed restoration
  - Bar-clasp vs. male-female solitary attachments for overdentures
  - Screw-retained vs. cemented fixed restoration
- Surgical guides: lab fabricated and computer-generated surgical guides

Implant prosthetics
- Implant prosthetic considerations
- Occlusion and stress distribution for overdentures and fixed restorations
- Prosthetic space requirement for overdenture or fixed restoration components
- Overdenture attachment selection: bar-clasp, solitary attachments
- Conversion of existing denture into implant-supported overdenture

Surgical placement of implants
- Surgical considerations and treatment planning
- Anatomic and skeletal considerations for overdenture vs. fixed restoration
- Loading protocol

Laboratory techniques and procedure
Hands-on workshop
- Participants will place implants in edentulous models and restore with overdenture

Live surgery demonstration
- Participants will observe implant placement and restoration with overdenture on a live patient

Who will benefit from attending this course?
This course is appropriate for any clinician who is interested in gaining a comprehensive training in implant dentistry, such as:
- Both novice and experienced clinicians
- Surgical specialists who would like to acquire a more in-depth understanding of implant restoration
- Restorative dentists who would like to acquire a more in-depth understanding of implant surgery
- Allied health professionals (laboratory technicians, dental hygienists, and dental assistants)
