Minimally Invasive Adhesive & Esthetic Dentistry:

A Review of Available Treatment Options & Materials

Ostrow School of Dentistry of USC
Friday, June 27, 2014
9:00 am - 5:00 pm

★ Life-Long Tradition and Excellence ★
Synopsis

Nowadays, patients are better informed and more demanding than ever, due to advances in material science, industry-driven marketing and advertising, media’s influence in forming public opinion regarding esthetics, and information available on the internet.

A successful dental practice must have a thorough understanding of the available materials and treatment options in all areas of interest to its patients, otherwise the office risks the loss of market share in “want-based dentistry.”

The purpose of this clinical and newly designed course is to provide participants with creative solutions to enhance patient’s esthetics through the use of minimally invasive dental products and procedures. All treatment options to enhance the patient’s smiles (except indirect procedures) will be reviewed in details.

In addition to extensive technique demonstration, a useful approach on how to incorporate these products and procedures into daily practice will be discussed.

Upon completion, participants should be able to:

• Thoroughly diagnose and establish a conservative treatment plan for all esthetic cases
• Perform smile analysis and apply smile design principles that mimic nature
• Sequence, determine a treatment plan, and present to patients for ideal esthetic outcomes
• Understand the esthetic and biological benefits of re-mineralization
• Know the advantages of at-home bleaching
• Offer options to manage most issues with bleaching sensitivity
• Perform safe and effective non-vital tooth whitening
• Understand the different bonding systems on the market, their advantages, disadvantages and indications
• Properly select cases that are ideal for direct composite veneering versus indirect porcelain veneers
• Fabricate silicone matrices to aid and simplify composite application
• Perform simple layering for beautiful optical effects that rival natural teeth
• Texturize and polish composite resin to mimic the natural tooth
• Perform composite repair & refurbishment
• Develop a fee structure to make direct restorations as profitable as indirect procedures

“Dr. Sameni always does a great job speaking.”
- Gary Aikawa, San Leandro, CA

“Very knowledgeable doctor.”
- Kamran Jafari, Chandler, AZ

Refunds are granted only if a written cancellation notification is received at least 21 days before the course. 50% of the tuition minus processing fee will be refunded if cancellation occurs within 14 days before this course. No refund is granted afterwards. A $75 fee is withheld for processing. For additional registrations, copy this form and send.

47 Hours of Continuing Education Units

University of Southern California Ostrow School of Dentistry is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

Fees include course material, continental breakfast and refreshments during breaks.

Minimally Invasive Adhesive & Esthetic Dentistry: A Review of Available Treatment Options & Materials
Friday, June 27, 2014 - Lecture Course

Dr. Abdi Sameni is Clinical Associate Professor of Dentistry and a graduate of the Ostrow School of Dentistry at USC. He has been a member of the USC clinical faculty since 1998. He is a former faculty for the “esthetic selective” which emphasizes a “biomimetic approach” to restorative and esthetic care. He was the original director of the USC Advanced Esthetic Dentistry Continuum for the portion relating to indirect porcelain veneers. He is the chairman and developer of the “USC International Restorative Dentistry Symposium” for the Ostrow School of Dentistry at USC.

Dr. Sameni lectures nationally and internationally on topics related to interdisciplinary dentistry, digital photography and its applications for dentistry, and various aspects of biomimetic and esthetic dentistry. He is past-president of the USC Dental Alumni Association, past-president of the USC Century Club, board of directors of the Pan Pacific Center for continuing oral health professional education and a member of the board of counselors for the Ostrow School of Dentistry of USC. Dr. Sameni serves on the board of governors for the USC Alumni Association and he is currently the co-chair of the Ostrow School of Dentistry at USC scholarship selection committee. Dr. Sameni is a member of numerous professional organizations and societies, including OKU and the Pierre Fauchard Academy. He had recently became a Fellow of the American College of Dentists in October of 2013. Dr. Sameni maintains a private practice in West Los Angeles, where he emphasizes comprehensive restorative dentistry, including implant reconstruction and esthetic dentistry.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service or/and company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.
