**Faculty**

**Ilan Rotstein, DDS (Course Director)**
Professor and Chair of the Division of Endodontics, Oral & Maxillofacial Surgery and Orthodontics, Associate Dean of Continuing Education at the Ostrow School of Dentistry of USC, Los Angeles, California.

**Thomas Levy, DDS, MS (Lab Director)**
Associate Professor of Clinical Endodontics, Division of Endodontics, Oral & Maxillofacial Surgery and Orthodontics at the Ostrow School of Dentistry of USC. Dr. Levy practiced endodontics for 24 years in Stockton, California.

**Yaara Berdan, DDS**
Clinical Assistant Professor of Endodontics, Division of Endodontics, Oral & Maxillofacial Surgery and Orthodontics at the Ostrow School of Dentistry of USC, Los Angeles.

**Daniel Schechter, DDS**
Assistant Professor of Clinical Endodontics, Division of Endodontics, Oral & Maxillofacial Surgery and Orthodontics at the Ostrow School of Dentistry of USC. Dr. Schechter practiced endodontics for 21 years in Huntington Beach, California.

**Louis Schwarzbach, DMD**
Clinical Assistant Professor of Endodontics, Division of Endodontics, Oral & Maxillofacial Surgery and Orthodontics at the Ostrow School of Dentistry of USC. Dr. Schwarzbach maintains a full-time private endodontic specialty practice in Northridge, California.

**Anthony Tran, DDS**
Clinical Assistant Professor of Endodontics, Division of Endodontics, Oral & Maxillofacial Surgery and Orthodontics at the Ostrow School of Dentistry of USC. Dr. Tran maintains a private endodontic practice in Fresno, California.

**Synopsis**

Molar endodontics often present challenges to the clinician. These may include difficulty in isolation and access, negotiation of curved and narrow root canals, calcified canals, difficulty in canal obturation, and managing anatomical variations. However, many advances in technology, materials and equipment have made it possible today to efficiently perform successful molar endodontic treatment with more precision and predictable results.

This two-day intensive course includes lectures and hands-on workshops and is specially designed for General Dentists who wish to advance their clinical skills when performing molar endodontics. Participants will learn how to perform efficient endodontic access, clean and shape the root canal system and finally obturate in a predictable manner. Participants will also perform endodontic treatment from start to finish in real maxillary and mandibular molar teeth. Without a doubt, this course will help you master molar endodontics.

**Topics to be discussed:**

- Endodontic anatomy and morphology of molar teeth
- Modern principles of endodontic access
- Root canal length determination - radiographic and electronic
- Cleaning and shaping of molar root canals
- Nickel Titanium rotary instrumentation
- Procedural errors and their prevention
- Root canal obturation
- Case selection for molar endodontics

**Upon Completion of the Course Participants Should Be Able To:**

- Enhance their knowledge of the clinical concepts of molar endodontics
- Successfully treat both upper and lower molar teeth
- Apply system-based approaches for treating endodontic cases
- Approach molar endodontic cases with more confidence and enjoy more predictable results
- Know when and what to refer

**Limited Attendance**

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.
