Upcoming Events

BASIC PROTOCOLS IN BONE AND SOFT TISSUE GRAFTING IN IMPLANT THERAPY
Friday - Saturday, May 31 - June 1, 2013

APPLIED HYPNOSIS: TREAT PAIN, TMD AND OTHER DENTAL CONDITIONS
Saturday - Sunday, April 20 - 21, 2013

COMPREHENSIVE PERIODONTAL SURGERY: ADVANCED TRAINING IN FUNCTIONAL AND ESTHETIC SOFT TISSUE PROCEDURES
Pre-Course Lecture: Thursday, April 25, 2013
Module I - Lecture & Hands-On: Friday, April 26, 2013
Module II - Lecture & Hands-On: Saturday, April 27, 2013

COMMON ORAL LESIONS: SOFT & HARD TISSUE DISEASES
Friday, May 3, 2013

LEARNING IMPLANT DENTISTRY FOR THE RESTORATIVE DENTIST
Saturday, May 4, 2013

ATRAUMATIC EXTRACTION AND MINIMALLY INVASIVE IMPLANT SITE DEVELOPMENT
Module IA - Lecture: Saturday, May 11, 2013

CLINICAL INTRAVENOUS SEDATION
Physical Evaluation: Monday, May 13, 2013
Emergency Medicine: Tuesday, May 14, 2013
Pharmacology: Wednesday, May 15, 2013
Monitoring & SIM-MAN: Thursday, May 16, 2013
Clinical Session - Part 1: Friday - Sunday, July 12 - 14, 2013
Clinical Session - Part 2: Friday - Sunday, July 19 - 21, 2013

Ostrow School of Dentistry of USC is an ADA CERP recognized provider
This two-day course focuses on the four main categories of Temporomandibular Disorder, namely arthrogenic, myogenic, derangements and uncommon TMD. The morning sessions on Friday and Saturday are in lecture format and will review the current standards for medical history and physical examination required for diagnosis. The lectures will include a rapid review of TMJ anatomy, TMJ mechanics and radiology including the use of 3D-CT. In addition, evidence-based treatment procedures appropriate for the above conditions will be presented. In the afternoon, participants will move to a clinical setting and observe demonstrations of how to conduct a thorough physical examination on patients with TMD. The goal of the afternoon session is to take a history, perform an examination and come up with a tentative diagnosis and effective treatment plan. Demonstrations will involve a review of the appropriate pharmacologic, behavioral, splint therapy and physical medicine management procedures. For example, myofascial pain-based exercises include stretching, mobilization and manipulation methods. Muscle injections (e.g. trigger point anesthetic and botox injections) and joint injections (e.g. sodium hyaluronate, arthrocentesis and corticosteroids) will be discussed. The commonly used occlusal orthotic devices will also be discussed and the common recommended prescriptions for pain and spasm management will be reviewed. Finally, case presentations of real patients will be presented with the goal of helping the participants become more comfortable in diagnosing and treating TMD disorders and providing them with a new understanding of TMD associated dysfunction and pain.

Upon completion of this course participants should be able to:

- Understand the process of making a TMJ diagnosis using a standardized TMJ examination
- Know the options for occlusal splint therapy
- Understand the various modalities of physical therapy used for TMD
- Know the medications commonly used for TMJ disorders
- Understand management of chronic myofascial pain using fluorimethane and trigger point therapy
- Know the basics of TMJ anatomy
- Identify the various types of TMJ disorders
- Understand the mechanism of myofascial pain induction and maintenance
- Know the appropriate use of TMJ radiology procedures including 3D-CT, panoramic films and MRI images
- Know how and when to perform intramuscular and intra-articular injections

Registration Fees
