ENDODONTICS FROM A TO Z:
A HANDS-ON WORKSHOP FOR THE GENERAL PRACTITIONER

21 hours of Lectures
21 hours of Hands-On Experience

Herman Ostrow School of Dentistry of USC
Friday - Sunday, 9:00 a.m. - 5:00 p.m.
July 13 - 15, 2018 (Part I)
July 27 - 29, 2018 (Part II)

“Endodontic treatment can be very challenging. This course has greatly allowed me to diagnose and treat my patients objectively with confidence.”
- Russell West, Santa Clarita, CA

“This course was helpful. It really opened my eyes to how endodontics really should be done. This is an awesome class.”
- La Ron Cotton, Orange, CA

★ Life-Long Tradition and Excellence ★
Endodontics has gone through many exciting changes in the past several years. Recent advances in technology, materials and equipment have changed the way endodontics is practiced today. These advances have made it possible to efficiently perform successful endodontic treatment with improved precision, predictable results, and with much greater patient acceptance.

This comprehensive state-of-the-art course includes series of seminars and hands-on workshops specially designed for General Dentists who wish to advance their knowledge and clinical skills in the art and science of endodontics. A team of endodontic specialists from the Herman Ostrow School of Dentistry of USC will thoroughly discuss evidence-based clinical and biological concepts of modern endodontic therapy. These experts will walk you, from start to finish, through all the necessary steps and phases that will enable you to enhance the way you practice endodontics so you can provide the best standards of endodontic care to your patients.

During the 3-day hands-on part of this course, you will have the opportunity to apply the principles discussed by the USC team of experts and practice in one of the most advanced facilities in California. You will perform endodontic treatment from start to finish in both single-rooted and multi-rooted teeth and will also practice endodontic retreatment.

Without doubt, this course will be a complete learning experience!

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any benefit associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.

Ilan Rotstein, DDS (Course Director)
Professor of Endodontics and Chair, Division of Endodontics, Orthodontics and General Practice Residency and Associate Dean of Continuing Education at the Herman Ostrow School of Dentistry of USC. Dr. Rotstein has published extensively in the endodontic literature and has lectured nationally and internationally.

Yaara Berdan, DDS (Lab Director)
Assistant Professor of Clinical Endodontics, Division of Endodontics, Orthodontics and General Practice Residency at the Herman Ostrow School of Dentistry of USC. She obtained her DDS degree from the University of California at San Francisco (UCSF) and her endodontic certificate from the University of Illinois at Chicago in 2000.

Mario Alvarez, DDS
Clinical Assistant Professor of Endodontics, Division of Endodontics, Orthodontics and General Practice Residency at the Herman Ostrow School of Dentistry of USC. Dr. Alvarez obtained his DDS from the Universidad Nacional Autonoma of Honduras and his endodontic certificate from USC.

Juan Pablo Ramirez, DDS
Graduated from the USC Advanced Endodontics Program. Dr. Ramirez currently practices endodontics in Round Rock, Texas, and has been actively involved in continuing education courses at the Herman Ostrow School of Dentistry of USC.

Rafael Roges, DDS
Director of the Advanced Education Program in Endodontics at the Herman Ostrow School of Dentistry of USC. Dr. Roges obtained his DDS degree from the University of California in San Francisco (UCSF) and his endodontic certificate from USC.

Daniel Schechter, DDS
Clinical Assistant Professor of Endodontics, Division of Endodontics, Orthodontics and General Practice Residency at the Herman Ostrow School of Dentistry of USC. Dr. Schechter maintained a private endodontic practice for over 20 years in Huntington Beach, California.

Louis Schwarzbach, DMD
Clinical Assistant Professor of Endodontics, Division of Endodontics, Orthodontics and General Practice Residency at the Herman Ostrow School of Dentistry of USC. Dr. Schwarzbach maintains a full time private endodontic specialty practice in Northridge, California.

Jaydeep Talim, DDS
Clinical Assistant Professor of Endodontics, Division of Endodontics, Orthodontics and General Practice Residency at the Herman Ostrow School of Dentistry of USC. Dr. Talim obtained his BDS, from Mumbai in 1993, and his endodontic certificate from USC. He is a Diplomate of the American Board of Endodontics.

Anthony T. Tran, DDS
Clinical Assistant Professor of Endodontics, Division of Endodontics, Orthodontics and General Practice Residency at the Herman Ostrow School of Dentistry of USC. Dr. Tran maintains a private practice limited to Endodontics in Fresno, California. He is a Diplomate of the American Board of Endodontics.

Additional instructors will be present during the hands-on workshops to enhance participant’s clinical experience.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any benefit associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.

Topics to be covered

- Diagnosis and case selection in endodontics
- Preparation for endodontic treatment
- Current principles of endodontic access
- Canal length determination including electronic apex locators
- Nickel Titanium rotary instrumentation
- Canal irrigation and intracanal medication
- Procedural errors and their prevention
- Root canal obturation techniques
- Use of ultrasonics to facilitate treatment
- Endodontic retreatment
- Endodontic-periodontal interaction
- Endodontic emergencies
- Endodontic treatment in the young patient
- Endodontic considerations in elderly patients
- Achieving better success in endodontic cases

Upon completion of this course you will be able to

- Enhance knowledge of clinical and biological concepts of modern endodontics
- Successfully treat single-rooted and multi-rooted teeth
- Apply system-based approaches and state-of-the-art technology for treating endodontic cases
- Use endodontic hand and rotary instruments safely and effectively

This course is recommended for doctors at any level who are interested in improving their clinical skills and treat teeth endodontically. It will provide participants with practical information and predictable techniques on how to perform appropriate endodontic access, and clean, shape and obturate the root canal system in three dimensions to improve treatment outcomes.

Participants are cautioned about the potential risks of using limited knowledge when integrating new techniques into your practices.
