Lecture: Saturday, July 30, 2011
Hands-On Workshop: Sunday, July 31, 2011
Lecture & Hands-On Workshop: Monday, August 1, 2011
Lecture & Hands-On Workshop: Tuesday, August 2, 2011

Online registration at www.uscdentalce.org
Unlike previous generations, older adults are seeking dental care in far greater numbers as their life span lengthens and the numbers of seniors in the population increase. Unique to this population are factors such as variable health profiles, including conventional and herbal or naturopathic medication regimens, social support systems, functional capabilities, residential arrangements and financial resources. Oral health findings can also be highly variable whether they compounded by a lifetime of treatment or neglect. Many individuals or their families expect to maintain or restore their dentition and receive regular oral health care with the latest innovative materials and technology available.

Recognizing the diverse nature of the elderly and their needs, this symposium will approach the older adult from a functional perspective and include topics that cover many of the relevant issues faced when treating aging individuals. Practice approaches for both the healthy, community-based patient and the frail institutionalized elder will be discussed.
