Upcoming Courses

THE 40TH ANNUAL USC INTERNATIONAL PERIODONTAL AND IMPLANT SYMPOSIUM
General Sessions: Friday - Saturday, January 23 - 24, 2015
Dental Hygiene Forum: Saturday, January 24, 2015
Cadaver Workshop (Dr. Zadeh): Wednesday, January 21, 2015
Hands-On Workshop (Dr. Lin): Wednesday, January 21, 2015
Cadaver Workshop (Dr. Urban): Thursday, January 22, 2015
Dental Hygiene Workshop: Saturday afternoon, January 24, 2015
Hands-On Workshop (Dr. Cho): Saturday afternoon, January 24, 2015
Hands-On Workshop (Dr. Cooper): Saturday afternoon, January 24, 2015
Hands-On Workshop (Dr. Han): Saturday afternoon, January 24, 2015
Hands-On Workshop (Dr. Khojasteh): Saturday afternoon, January 24, 2015
Cadaver Workshop (Dr. Wallace): Sunday, January 25, 2015
Cadaver Workshop (Dr. Wang): Sunday, January 25, 2015

CHRONIC DROFACIAL, ORODENTAL AND HEADACHE PAINS FOR THE DENTIST
Friday - Saturday, January 30 - 31, 2015

ORAL SURGERY FOR THE GENERAL PRACTITIONER
Saturday, January 31, 2015

IMPLANT CPR! SUCCESSFUL MANAGEMENT OF PROSTHETIC IMPLANT COMPLICATIONS
Module I - Lecture: Friday, February 6, 2015
Module II - Hands-On: Saturday, February 7, 2015

PORCELAIN VENEERS: OPTIMIZING RESULTS USING SUPRAGINGIVAL PRINCIPLES, AND UNDERSTANDING ADHESION AND OCCLUSION
Friday, February 6, 2015

EMERGING DISEASES, INFECTION CONTROL AND CALIFORNIA DENTAL PRACTICE ACT
Saturday, February 7, 2015

MASTERING MOLAR ENDODONTICS
Friday - Saturday, February 20 - 21, 2015

FUNDAMENTAL PRINCIPLES OF RESTORATIVE IMPLANT DENTISTRY FOR THE SINGLE MISSING TOOTH
Part I - Lecture: Friday, February 20, 2015
Part II - Hands-On: Saturday, February 21, 2015

3 + 1 Free CE Program
The More You Learn, The More You Earn!
Take any 3 CE courses between January and December 2015 and receive another course for FREE.

Registration Fees
Before February 10, 2015
Dentist: $1,995
Auxiliary: $1,695

After February 10, 2015
Dentist: $2,195
Auxiliary: $1,865

Refunds are granted only if a written cancellation notification is received at least 21 days before the course. 50% of the tuition minus processing fee will be refunded if cancellation occurs within 14 days before the course. No refund is granted afterwards. A $75 fee is withheld for processing. For additional registrations, xerox this form and send.

20 Hours of Continuing Education

Hands-On Workshop and Live Surgery Course
Herman Ostrow School of Dentistry of USC
Friday, February 27, 2015, 8:00 am - 5:00 pm
Saturday, February 28, 2015, 8:00 am - 4:00 pm
Sunday, March 1, 2015, 8:00 am - 1:00 pm
Online registration available at www.uscdentalce.org
Homayoun H. Zadeh, DDS, PhD (Course Director)
Dr. Zadeh is a tenured Associate Professor and the director of the post-doctoral periodontology program at the University of Southern California and a diplomate of the American Board of Periodontology. Dr. Zadeh directs the Laboratory for Immunoregulation and Tissue Engineering (LITE) at USC, dedicated to studying basic mechanisms to regulate bone and tissue regeneration/destruction under health/disease states, as well as conducting clinical trials of dental implant outcomes. His clinical research interests involve studies on minimally-invasive surgery and tissue engineering. He maintains a part-time private practice limited to Periodontology and Implants in Southern California.

Ramin Mahallati, DDS
Dr. Mahallati graduated from the Herman Ostrow School of Dentistry of USC where he also completed his advanced specialty training in Prosthodontics. He is a former Clinical Assistant Professor at Ostrow School of Dentistry. Presently, he maintains a private practice limited to Prosthodontics and Implant dentistry in Beverly Hills, California. He is also involved in research in the areas of Implant Dentistry and Dental Materials. He has presented nationally and internationally in the field of Implant Dentistry.

Dr. Alexandre-Amir Aalam, DDS
Dr. Aalam graduated with a DDS degree from the University of Nice Sophia Antipolis, Nice (France). He subsequently specialized in Advanced Periodontics at the University of Southern California, Los Angeles. Dr. Aalam is a Diplomate of the American Board of Periodontology and a Diplomate of the American Board of Oral Implantology. The French Society and the California Society of Periodontology awarded Dr. Aalam for his contribution to clinical research in the field of implant dentistry. Dr. Aalam is a Clinical Assistant Professor of dentistry at USC. He maintains a private practice in Brentwood CA, limited to Periodontics and Reconstructive Implant Dentistry.

The anterior maxilla is often referred to as the “esthetic zone.” Tooth replacement in the esthetic zone presents unique challenges for the clinician. Yet, achievement of optimal esthetics in this area can be most rewarding. The prerequisites for achieving a successful esthetic outcome in this region includes: 1) knowledge of the biology of the implant-prosthesis-tissue interface and their post-treatment alterations; 2) careful preoperative treatment planning; 3) augmentation of hard and soft tissues when deficiencies exist; and 4) attention to details in the execution of surgical and prosthetic techniques. This course will review the biological fundamentals, as well as the clinical, surgical and restorative techniques involved.

This course is recommended for:
• Surgical specialists and restorative dentists who would like to acquire a more in-depth and comprehensive understanding, as well as practical skills to achieve predictable treatment outcome in the esthetic zone
• Allied professionals (laboratory technicians, dental hygienists and dental assistants) who participate as members of the implant therapy team and would like to be more effective in their functions by enhancing their fundamental and practical knowledge

Topics to be discussed:
• Biology of implant-prosthesis-tissue interface
• Factors affecting the stability of the peri-implant tissues
• Treatment planning and case selection:  
  - Surgical considerations  
  - Prosthetic considerations
• Diagnostic tools: CT imaging, surgical guide
• Computer-assisted implant positioning
• The applications of the microscope in implant surgery
• Influence of implant component design on esthetic outcome
• Selection and sequencing of implant site-development techniques
• Orthodontic therapy for site development
• Vestibular Incision Subperiosteal Tunnel Access (VISTA) for soft tissue augmentation
• VISTA for ridge augmentation in the esthetic zone
• Papilla preservation and regeneration around implants
• Minimally invasive tooth extraction
• Ridge preservation and augmentation
• Immediate vs. staged implant placement
• Minimally invasive implant placement
• Immediate vs. delayed implant loading
• Implant impression techniques
• Abutment selection
• Provisional placement: immediate vs. staged
• Laboratory techniques and procedures

Hands-on workshop + Live Surgery Demonstration
• Minimally invasive tooth extraction
• Ridge preservation techniques
• Implant placement into extraction socket
• Provisional fabrication

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.
