Advanced Implant Protocols
SYNOPSIS

A variety of clinical scenarios may present themselves, requiring complex prosthetic restoration. A key to success is careful planning and simplification of therapy, based on sound principles. A wide array of restorative options are available today. Selection of the appropriate prosthesis requires consideration of the patient’s anatomy; quantity and quality of available hard and soft tissues; the need for augmentation surgery; esthetic requirements; occlusal scheme; and the patient’s desires. The objective of this course is to review the fundamentals for prosthetic restoration of implants in patients. An evidence-based approach will be used to provide treatment options with a high degree of predictability. Practical solutions to common prosthetic problems will be provided.

Topics to be discussed:

• Prosthetic options for complex cases
• Treatment of fully edentulous maxilla and mandible
• Treatment of compromised dentition requiring full-arch extraction
• Decision tree for selection of fixed versus removable restoration
• Immediate and early loading
• Diagnostic tools: CT imaging, surgical guides
• Computer-assisted planning and implant positioning
• Immediate implant placement vs. staged implant placement
• Assessment of need and sequencing of implant site development techniques
• Implant impression techniques
• Screw-retained vs. cement-retained restorations
• Application of CAD/CAM in abutment and restoration fabrication
• Abutment selection guidelines
• Occlusal considerations and guidelines
• Provisional options and techniques
• Prosthetic complication and their management
• Dental materials used in implant restoration
• Laboratory techniques and procedures

Hands-On Model Workshop

• Implant placement and fabrication of immediate load full-arch prosthesis

Live Surgery Demonstration

• Guided surgical implant placement
• Fabrication of immediate-load full-arch prosthesis

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP feels that this disclosure is important for the participants to form their own judgment about each presentation.

REGISTRATION FEES

Before March 1, 2011
  Dentist: $1,995 • Auxiliary $995

After March 1, 2011
  Dentist: $2,195 • Auxiliary $1,195

* This course is suitable for clinicians with intermediate or advanced experience in implant dentistry.
