ADVANCED SOFT TISSUE AND BONE GRAFTING WITH CADAVER WORKSHOP
Lecture, Hands-On Cadaver, Live Demonstrations
Ostrow School of Dentistry of USC
Friday - Sunday, June 7 - 9, 2013
8:00 a.m. - 5:00 p.m./8:00 a.m. - 6:00 p.m.
Online registration available at www.uscdentalce.org

24 Hours of Continuing Education

Registration Fees
Before May 1, 2013
Dentist $2,995
Auxiliary $1,595
After May 1, 2013
Dentist $3,295
Auxiliary $1,795
Fees include course material, continental breakfast, lunch, and refreshments during breaks.

Please mail checks and make payable to:
Ostrow School of Dentistry of USC
Office of Continuing Education
925 W. 34th Street, Room 201J
Los Angeles, CA 90089-0641
Phone: 213.821.2127
Fax: 213.740.3973
E-mail: cedental@usc.edu
Website: www.uscdentalce.org

Refunds are granted only if a written cancellation notification is received at least 21 days before the course. 50% of the tuition minus processing fee will be refunded if cancellation occurs within 14 days before the course. No refund is granted afterwards. A $75 fee is withheld for processing. For additional registrations, xerox this form and send.

Upcoming Courses

BASIC PROTOCOLS IN BONE AND SOFT TISSUE GRAFTING IN IMPLANT THERAPY
Friday - Sunday, April 5 - 7, 2013
APPLIED HYPNOSIS: TREAT PAIN, TMD, AND OTHER DENTAL CONDITIONS
Saturday - Sunday, April 20 - 21, 2013
ESTHETIC PERIODONTAL SURGERY FOR THE GENERAL PRACTITIONER
Module I - Lecture: Friday, April 26, 2013
COMMON ORAL LESIONS: SOFT & HARD TISSUE DISEASES
Friday, May 3, 2013
LEARNING IMPLANT DENTISTRY FOR THE RESTORATIVE DENTIST
Saturday, May 4, 2013
ATRAUMATIC EXTRACTION AND MINIMALLY INVASIVE IMPLANT SITE DEVELOPMENT
Part I A: Saturday, May 11, 2013
Part I B: Saturday, May 11, 2013
PHYSICAL EVALUATION
Monday, May 13, 2013
EMERGENCY MEDICINE
Tuesday, May 14, 2013
PHARMACOLOGY
Wednesday, May 14, 2013
MONITORING AND SIM-MAN
Thursday, May 15, 2013

3 + 1 Free CE Program
The More You Learn, The More You Earn!
Take any 3 CE courses between January and December 2013 and receive another course for FREE.

Life-Long Tradition and Excellence
SPEAKERS

Homayoun H. Zadeh, DDS, PhD (Course Director)
Associate Professor, Ostrow School of Dentistry of USC. Dr. Zadeh is a graduate of the Ostrow School of Dentistry. He completed the advanced clinical education in Periodontology and earned his PhD degree in Immunology from the University of Connecticut. He is a Diplomat of the American Board of Periodontology. He serves as the editorial reviewer for several scientific journals, and chairs a Scientific Study Section of NIH. Dr. Zadeh also leads a research team, funded by the NIH. His clinical research interests involve studies on minimally-invasive surgery and tissue engineering. He is Director of USC International Periodontal and Implant Symposium and maintains a part-time private practice limited to Periodontology and Implants in Southern California.

Dan Cullum, DDS
Dr. Cullum completed his DDS with distinction at the University of Alberta, Canada and residency training at Westchester Medical Center, New York. Dr. Cullum is a Diplomat of the American Board of Oral and Maxillofacial Surgery and speaks internationally. He is on faculty at Loma Linda University, Department of Oral and Maxillofacial Surgery as a visiting lecturer and has contributed textbook chapters on implant reconstruction. Dr. Cullum serves in leadership roles at national, state and local societies. At Implants Northwest (Coeur d’Alene, ID), he practices Oral and Maxillofacial Surgery with emphasis on immediate and minimally invasive techniques in esthetic implant reconstruction. Dr. Cullum is also president of Implants Northwest LIVE Learning Center, which emphasizes training in advanced techniques for surgeon/restorative teams using LIVE surgery and hands-on application in a small group environment.

Stephen Wallace, DDS
Dr. Wallace is a graduate of Boston University School of Graduate Dentistry with a certificate in Periodontics. He is Associate Professor at the New York University Department of Implant Dentistry and a Diplomate of the International Congress of Oral Implantology and a Fellow of the Academy of Osseointegration. He lectures in the United States and abroad on dental implantology and periodontics. He is the author of journal articles and textbook chapters on implantology and co-editor of sinus elevation textbook released in Italy. Dr. Wallace maintains a private practice limited to Periodontics in Waterbury, CT.

SYNOPSIS

The success of dental implants depends on their placement in bone of adequate density and volume in order to achieve primary stability. However, usually there is at least some degree of atrophy in most implant sites due to postextraction remodeling or because of pathologic conditions. There has been a gradual shift in paradigm from merely achieving successful osseointegration to achieving final restorative outcomes that mimic natural dentition and the surrounding oral tissues. These objectives have been materialized by advancements in surgical techniques, as well as availability of biomaterials to enable predictable regeneration of oral hard and soft tissues. This course consists of two modules. The first module consists of two and half days of lecture, hands-on model workshop and live surgery. The second module is a half-day cadaver workshop.

This course is recommended for:
- Clinicians interested in gaining practical and in-depth surgical experience with bone and soft tissue augmentation techniques necessary for management of complex implant patients.
- Allied professionals (dental assistants hygienists and dental hygienists) who participate as members of the implant therapy team and would like to be more effective in their functions by enhancing their fundamental and practical knowledge.

Topics to be discussed:
- Selection and sequencing of implant site development techniques
- Sinus augmentation rationale and techniques
- Piezosurgery techniques
- Horizontal ridge augmentation
- Vertical ridge augmentation
- Ridge splitting and expansion
- Mandibular block auto-grafting
- Onlay block grafts: rationale and techniques
- Guided bone regeneration (GBR)
- Bone morphogenetic protein (rhBMP-2) and PDGF applications
- Soft tissue augmentation around implants
- Vestibular Incision Subperiosteal Tunnel Access (VISTA) for soft tissue augmentation
- VISTA for ridge augmentation in the esthetic zone
- Immediate loading
- Minimally invasive tooth extraction
- Socket preservation and augmentation
- Immediate implant placement vs. staged implant placement

Hands-On Cadaver Workshop
- Lateral window and crestal osteotomy sinus augmentation
- Donor graft harvesting from ramus and symphysis
- Recipient site preparation and block graft fixation
- Piezosurgery techniques
- Guided bone regeneration (GBR)
- Flap and tunnel access design
- Soft tissue augmentation around implants (VISTA)
- Socket preservation and augmentation

Live Surgery Demonstration
- Lateral window sinus augmentation and implant placement
- Soft tissue augmentation with VISTA

* This course is suitable for clinicians with intermediate or advanced experience in implant dentistry.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficiially associated therewith that will be discussed or considered during their presentation. The Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.
