★ Life-Long Tradition and Excellence ★
All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.

**Speaker**

**George C. Cho, DDS, FACP**  
(Course Director)

Dr. Cho is Associate Professor in the Division of Restorative Sciences, Co-Director of the Advanced Education in Prosthodontics and Director of Predoctoral Implant Dentistry at the Ostrow School of Dentistry of USC. Dr. Cho received his dental degree in 1987 and graduated from the Advanced Education in Prosthodontics Program in 1990 from the Ostrow School of Dentistry, and has been since a full time faculty member. He is also a fellow of the American Board of Prosthodontics, member of the American Academy of Restorative Dentistry, ADA, CDA, and Western Los Angeles Dental Society. Dr. Cho maintains a private practice limited to Prosthodontics in Torrance, California.

**Topics to be discussed:**
- Implant Introduction- history and types
- CT Scans- reading and identifying structures and position of implants
- Radiographic/Surgical Guides
- Implant Components- screws, screw drivers and abutments
- Implant position
- Treatment Planning for simple implant restorations
- Implant provisional restorations
- Soft tissue management for implant restorations
- Cement vs screw retained restorations

**Upon Completion Participants Should Be Able To:**
- Understand and identify implant components with parts identification
- Discuss optimal implant position
- Understand use and purpose of radiographic and surgical guide
- Become familiar with treatment planning sequence for uncomplicated implant
- Understand the financial implications of implants vs conventional dentistry
- Manipulate soft tissue around implant for best gingival architecture
- Know the sequence for delivering the uncomplicated implant restoration

**Synopsis**

Successful implant osseointegration is well documented over the past forty years. This course will educate the dentist in the most predictable manner to diagnose and treat patients presenting missing teeth with dental implants and their restoration. Aspects of treatment planning will be discussed and conventional dentistry vs implant dentistry will be compared. The participant will become knowledgeable about CT scan, radiographic and surgical guides, implant components, implant provisional restorations and screw retained and cement retained restoration. This course is designed for those that wish to begin implant treatment for their patients and those that would like a better basic understanding of dental implants.

“Excellent! Very useful for the beginners!”
-Narine Danielian, DDS

“Thank you Dr. Cho for clearing up the dark cloud about implants which has been looming over my head. With all the information about implants out there, I finally decided to take a course to better understand implants only to be more confused as I took seminar after seminar about implants. I am so happy that today, I leave with a clearer understanding of implants and am looking forward to learning more. This was a great “101 on Implants.” I’m pleased I attended today!”
-Elizabeth Alikpala, DDS

University of Southern California Ostrow School of Dentistry is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.
