★ Life-Long Tradition and Excellence ★
Speakers

Ilan Rotstein, DDS (Course Director)
Professor of Endodontics and Chair, Division of Endodontics, Orthodontics and General Practice Residency and Associate Dean of Continuing Education at the Herman Ostrow School of Dentistry of USC.

Thomas Levy, DDS, MS (Lab Director)
Associate Professor of Clinical Endodontics, Division of Endodontics, Orthodontics and General Practice Residency at the Herman Ostrow School of Dentistry of USC. Dr. Levy practiced endodontics in Stockton, California for over 20 years.

Yaara Berdan, DDS
Assistant Professor of Clinical Endodontics, Division of Endodontics, Orthodontics and General Practice Residency at the Herman Ostrow School of Dentistry of USC, Los Angeles.

Daniel Schechter, DDS
Clinical Assistant Professor of Endodontics, Division of Endodontics, Orthodontics and General Practice Residency at the Herman Ostrow School of Dentistry of USC. Dr. Schechter maintained a private endodontic practice for over 20 years in Huntington Beach, California.

Louis Schwarzbach, DMD
Clinical Assistant Professor of Clinical Endodontics, Division of Endodontics, Orthodontics and General Practice Residency at the Herman Ostrow School of Dentistry of USC. Dr. Schwarzbach maintains a full time private endodontic specialty practice in Northridge, California.

Anthony Tran, DDS
Clinical Assistant Professor of Endodontics, Division of Endodontics, Orthodontics and General Practice Residency at the Herman Ostrow School of Dentistry of USC. Dr. Tran maintains a private practice limited to Endodontics in Fresno, California. He is a Diplomate of the American Board of Endodontics.

Molar endodontics often present challenges to the clinician. These may include difficulty in isolation and access, negotiation of curved and narrow root canals, calcified canals, difficulty in canal obturation, and managing anatomical variations. However, today many advances in technology, materials and equipment have made it possible to efficiently perform successful molar endodontic treatment with more precision and predictable results.

This two-day intensive course includes lectures and hands-on workshops and is specially designed for General Dentists who wish to advance their clinical skills when performing molar endodontics. Participants will learn how to perform efficient endodontic access, clean and shape the root canal system and finally obturate in a predictable manner. Participants will also perform endodontic treatment from start to finish in real maxillary and mandibular molar teeth. Without a doubt, this course will help you master molar endodontics.

Limited Time Offer!
Participants will be entered in a special raffle to win a copy of the world renowned textbook, Ingle’s Endodontics - 6th Edition, a $150 value! Winner will be chosen in a random drawing at the first day of the course.

Corporate Sponsors

University of Southern California Herman Ostrow School of Dentistry is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.

Synopsis

Topics to be discussed:

- Endodontic anatomy and morphology of molar teeth
- Modern principles of endodontic access
- Root canal length determination - radiographic and electronic
- Cleaning and shaping of molar root canals
- Nickel Titanium rotary instrumentation
- Procedural errors and their prevention
- Root canal obturation
- Case selection for molar endodontics

Upon Completion of the Course Participants Should Be Able To:

- Enhance knowledge of clinical concepts of molar endodontics
- Successfully treat both upper and lower molar teeth
- Apply system-based approaches when treating endodontic cases
- Approach molar endodontic cases with more confidence and enjoy more predictable results
- Know when and what to refer

Limited Attendance
