Ostrow School of Dentistry of USC
Certification Program
Wednesday - Sunday, November 6 - 10, 2013
8:30 a.m. - 5:00 p.m.
Stanley F. Malamed, DDS

Dr. Malamed graduated from the New York University College of Dentistry in 1969. In 1973, he joined the faculty of the Ostrow School of Dentistry of USC, and is now a recently retired Professor of Anesthesia and Medicine and a Diplomate of the American Board of Anesthesiology. During his tenure at the University of Southern California, he has received the Heidebrink Award (1996) from the American Dental Society of Anesthesiology, and the Horace Wells Award from the International Federation of Dental Anesthesia Societies (1997). Dr. Malamed has authored more than 140 scientific papers and 17 chapters in various medical and dental journals and textbooks in the areas of physical evaluation, emergency medicine, local anesthesia, sedation, and general textbooks. In his spare time, Dr. Malamed enjoys exercising vigorously and maintaining a healthy addiction to the New York Times crossword puzzle since his freshman year at NYU.

Ken Reed, DMD

Dr. Reed is Clinical Associate Professor at the Oregon Health Sciences University School of Dentistry in Portland and Assistant Director of Advanced Education in General Dentistry, Arizona Region, at the Luthern Medical Center in New York. He obtained his D.M.D. from the Oregon Health Sciences University School of Dentistry in 1989 and his specialty certificate in Periodontology in 1991. He is a Diplomate of the National Dental Board of Anesthesiology and a member of the Board of Directors of the American Dental Society of Anesthesiology. He is currently Chair of the Committee on Examinations of the American Dental Society of Anesthesiology as well as Chair of the Component Development. Dr. Reed is a reviewer for several dental journals, and has lectured extensively on anesthesiology and related topics.

The focus of this course is sedation of the pediatric patient receiving dental care. The purpose is to prepare the participant to deliver safe and effective enteral (oral) moderate sedation to the patient under the age of 13 years. This course is designed to meet requirements for a pediatric enteral moderate sedation (OMS) permit in California and most other states.

Part 1 of the course will include discussion of guidelines for pediatric OMS; physiology & psychology of the child; sedation techniques for children including N2O-02, intranasal, intravenous and general anesthesia; pharmacology of OMS drugs; protocols; monitoring; record keeping; physical evaluation; medically compromised and special needs patients.

Part 2 (Friday through Sunday) involves participation in the recognition & management of unintended consequences (oversedation and medical emergencies) utilizing an anesthesia simulator (SIM-MAN) and training in pediatric advanced life support (PALS)*.

Faculty for SIM-MAN:
Amanda Okundaye, DDS
Andrea Fonner, DDS

* PALS certification will be provided by Coleman Education Opportunities (CEO).

Upon completion participants should be able to:

- Understand the anatomic and physiologic differences between child and adult patients
- Describe the indications, contraindications, advantages and disadvantages of inhalation sedation with N2O-02 in the pediatric patient
- Discuss the appropriate use of N2O-02 in combination with oral sedation
- Understand the indications, contraindications, advantages and disadvantages of oral moderate sedation in the pediatric patient
- Discuss commonly orally-administered CNS-depressants recommended for use in pediatric OMS and describe the pharmacologic actions of these drugs on the CNS, respiratory system, and cardiovascular system
- Outline the protocol for a pediatric OMS appointment
- Determine the maximum recommended dosage of local anesthetic agents in pediatric dental patients
- Describe the monitors employed during pediatric OMS
- Describe the record keeping required for pediatric OMS
- List the criteria for discharge from the dental office of the pediatric patient receiving OMS
- Diagnose and manage oversedation and the unconscious patient
- Describe the ASA Physical Status Classification System giving examples of each category
- Diagnose and treat the medical emergency situations mandated by the Dental Board of California

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.
