3 + 1 Free CE Program
The More You Learn, The More You Earn!
Take any 3 CE courses between January and December 2012 and receive another course for FREE.

Upcoming Courses

THE ARTISTIC DENTIST: EXCELLENCE IN DIRECT ANTERIOR AND POSTERIOR COMPOSITES
Friday - Saturday, August 17 - 18, 2012

NEW APPROACHES FOR ANTIMICROBIAL TREATMENT OF PERIODONTAL DISEASE
Friday, August 24, 2012

MASTERING BONE GRAFTING FOR IMPLANT SITE DEVELOPMENT
Module I - Lecture: Saturday, August 25, 2012
Module II - Cadaver Workshop: Sunday, August 26, 2012

FUNDAMENTALS OF IMPLANT SURGERY AND RESTORATION
Part I: Friday - Saturday, September 7 - 8, 2012
Part II: Saturday - Sunday, October 6 - 7, 2012
Part III: Saturday - Sunday, November 10 - 11, 2012

USC RUTH RAGLAND 26TH DENTAL HYGIENE SYMPOSIUM
Saturday, September 8, 2012

EMERGING DISEASES, INFECTION CONTROL AND CALIFORNIA DENTAL PRACTICE ACT
Saturday, September 15, 2012

FUNCTIONAL CROWN LENGTHENING SURGERY - FOR IMPROVED AND PREDICTABLE RESTORATIVE OUTCOMES
Saturday, September 15, 2012

THE USC 5TH INTERNATIONAL RESTORATIVE DENTISTRY SYMPOSIUM
Friday - Saturday, September 21 - 22, 2012

Ostrow School of Dentistry of USC is an ADA CERP recognized provider

Refunds are granted only if a written cancellation notification is received at least 21 days before the course. 50% of the tuition minus processing fee will be refunded if cancellation occurs within 14 days before the course. No refund is granted afterwards. A $70 fee is withheld for processing. For additional registrations, copy this form and send.

Prepless Porcelain Veneers
Lecture & Hands-On Workshop
Limited Attendance
Ostrow School of Dentistry of USC
Saturday - Sunday, November 3 - 4, 2012
9:00 a.m. - 5:00 p.m.
Upon Completion of the Course Participants Should Be Able To:

- Understand the indications and limitations of “prepless veneer”
- Become proficient in veneer fabrication and porcelain build up
- Select esthetic and reliable bonding system for delivery
- Conduct finishing and polishing of prepless veneers

Preserving tooth structure is fundamental to providing support and resistance to bonded restorations. With proper diagnosis and execution, ultra-conservative prepless veneers can be performed and porcelain laminate veneers can be fabricated with minimal or no tooth preparation. The preservation of dental enamel allows superior bonding to porcelain veneers and, therefore, increases the longevity of the restoration.

This hands-on course includes the basic principles of case selection, bonding techniques, and laboratory porcelain design for prepless veneers. The didactic portion of the course involves proper diagnosis, study of color and appearance of tooth structures and its communication. In the laboratory phase, the participants will observe the porcelain build up process to create “prepless veneer” restorations with invisible margins. Participant manipulation, bonding, and finishing will also be covered.

**Topics To Be Covered:**

- Diagnosis and Case Selection for prepless veneers
- Shade selection and laboratory communication
- Diagnostic wax-up and mock up
- Laboratory fabrication of prepless veneers
- Bonding procedures for porcelain laminate veneers

**Upon Completion of the Course Participants Should Be Able To:**

- Understand the indications and limitations of “prepless veneer”
- Become proficient in veneer fabrication and porcelain build up
- Select esthetic and reliable bonding system for delivery
- Conduct finishing and polishing of prepless veneers

---

**Speakers**

**Domenico Cascione MDT, BS**
Obtained his primary education in Bari (Italy), where he was also certified as a Dental Technologist (CDT) in 1985. From 1991 to 2004 he carried out metallurgy research becoming a specialist in dental metallurgy. From 1986 to 2004 he was the owner and director of Dental Laboratory in Bari (Italy). He is a Master Ceramist and also specializing in metallurgy, implant work and complex esthetic rehabilitation. From 2005 to 2008 he was Research Associate and Program Director, Advanced Training for Dental Technology at the Center for Dental Technology, the Ostrow School of Dentistry of USC. He is a Clinical Assistant Professor and Course Director of the Advanced Dental Morphology for the Operative Dentistry Program at USC. He is a winner of the 2007 Judson C. Hickey award in the research category in the Journal of Prosthetic Dentistry. He is Editor-in-Chief of the Spectrum Dialogue magazine and President of OPERART, LLC, dental laboratory in Santa Monica, California. He is author and co-author of several articles in the literature. He is the author of *Symbiosis: Art & Technique.*

**Sillas Duarte, DDS, MSc**
Dr. Duarte is Associate Professor and Division Chair of Restorative Sciences at the Ostrow School of Dentistry of USC. He is the editor-in-chief of Quintessence of Dental Technology (QDT), served on the editorial boards of other journals, and has lectured and published nationally and internationally on esthetic dentistry and adhesion. He has been involved in teaching cutting edge clinical techniques and technologies related to esthetic and adhesive dentistry. His research focuses on bonding to dental structures, composites, and ceramics. Dr. Duarte lectures in the United States and abroad.
