No refund is granted afterwards. A $75 fee is withheld for processing. For additional registrations, xerox this form and send.

Herman Ostrow School of Dentistry of USC
Continuing Professional Education

Life-Long Tradition and Excellence
This bone graft course will feature a combined one-day scientific lecture and hands-on workshop. The course will focus primarily on the principles of guided bone regeneration in implant dentistry and on the most up-to-date techniques in bone grafting to improve long-term clinical success with dental implants. This course is designed for the clinician that has prior implant experience and would like to broaden his/her knowledge and scope of practice and improve surgical skill.

Upon Completion Participants Should Be Able To Know:

• The biologic basis of bone regeneration
• The criteria for patient selection
• Step-by-step surgical procedure
• Properties of barrier membranes
• Selection of biomaterials
• Biologic modifiers and their relationship to bone regeneration
• Flap design for optimal esthetic and predictability
• Guided bone regeneration in various post-extraction defects
• Guided bone regeneration for simultaneous implant placement - "the Esthetic Contour Graft"
• Guided bone regeneration for vertical ridge augmentation
• The proper use of screws in the “screw tent-pole grafting” technique
• All aspects of the post-operative management
• Recognition and management complications associated with guided bone regeneration
