7 Hours of Continuing Education

Upcoming Courses

IMPLANT CPR! SUCCESSFUL MANAGEMENT OF PROSTHETIC IMPLANT COMPLICATIONS
Module I - Lecture: Friday, February 6, 2015
Module II - Hands-On Workshop: Saturday, February 7, 2015

PORCELAIN VENEERS: OPTIMIZING RESULTS USING SUPRA-GINGIVAL PRINCIPLES, AND UNDERSTANDING ADHESION AND OCCLUSION
Friday, February 6, 2015

EMERGING DISEASES, INFECTION CONTROL AND CALIFORNIA DENTAL PRACTICE ACT
Saturday, February 7, 2015

FUNDAMENTAL PRINCIPLES OF RESTORATIVE IMPLANT DENTISTRY FOR THE SINGLE MISSING TOOTH
Part I - Lecture: Friday, February 20, 2015
Part II - Lecture, Demonstration, Hands-On: Saturday, February 21, 2015

MASTERING MOLAR ENDOdontics
Friday - Saturday, February 20 - 21, 2015

IMPLANT THERAPY IN THE ESTHETIC ZONE
Friday - Sunday, February 27 - March 1, 2015

THE SECRETS OF GUIDED BONE REGENERATION IN IMPLANT DENTISTRY: HANDS-ON WORKSHOP
Saturday, March 7, 2015

USC RUTH RAGLAND 29TH DENTAL HYGIENE SYMPOSIUM
Saturday, March 14, 2015

ESTHETIC FULL-MOUTH IMPLANT RECONSTRUCTION: FROM TREATMENT PLANNING TO FIXED RESTORATION
Module I - Lecture: Friday, March 20, 2015
Module II - Lecture: Saturday, March 21, 2015

OBSTRUCTIVE SLEEP APNEA, SNORING AND DENTAL ADVANCEMENT
Friday - Saturday, March 27 - 28, 2015

LEARNING IMPLANT DENTISTRY FOR THE RESTORATIVE DENTIST
Part I: Saturday, March 28, 2015
Part II: Saturday, May 9, 2015

3 + 1 Free CE Program
The More You Learn, The More You Earn!
Take any 3 CE courses between January and December 2015 and receive another course for FREE.

Registration Fees
Before April 1, 2015
Dentist: $245
Auxiliary: $210
After April 1, 2015
Dentist: $295
Auxiliary: $250
Fees include course material, continental breakfast, and refreshments during breaks.

Refunds are granted only if a written cancellation notification is received at least 21 days before the course. 50% of the tuition minus processing fee will be refunded if cancellation occurs within 14 days before the course. No refund is granted afterwards. A $75 fee is withheld for processing. For additional registrations, xerox this form and send.

Continuing Professional Education

Surgical and Periodontal Perspectives on Implant Treatment Planning

3 Hours of Continuing Education
Speakers

Alon Frydman, DDS
Dr. Frydman is Assistant Professor of Clinical Dentistry in the Division of Periodontology, Diagnostic Sciences and Dental Hygiene and the Division of Restorative Sciences at the Herman Ostrow School of Dentistry of USC. Dr. Frydman received his dental degree from UCLA and graduated from the Advanced Periodontology Program at USC, where he has since been a faculty member. Dr. Frydman teaches courses in treatment planning and implant therapy for both Advanced Periodontology residents as well as dental students. He lectures nationally and is a Diplomate of the American Board of Periodontology, a member of the American Academy of Periodontology, ADA, CDA and the Western Los Angeles Dental Society.

Krikor Simonian, DDS
Dr. Simonian is a graduate of the Herman Ostrow School of Dentistry of USC. He practiced as a general dentist for 11 years, and in the meantime held a faculty position at USC. He obtained his specialty certificate in 2004 upon completion of the 3 year program in Advanced Periodontology at USC, and his board certification by the American Board of Periodontology in 2005. He is a Clinical Assistant Professor at the Herman Ostrow School of Dentistry of USC Advanced Periodontology Program and has lectured nationally. He has published in several leading peer-reviewed journals, including Journal of Periodontology, International Journal of Oral & Maxillofacial Implants, Journal of the California Dental Association, Clinical Implant Dentistry and Related Research, Clinical Advances in Periodontics and the Journal of the Western Society of Periodontology. Dr. Simonian is an active member of the American Board of Periodontology, American Academy of Periodontology, American Dental Association, California Dental Association and the San Gabriel Valley Dental Society.

Synopsis

Understanding implant treatment planning requires both restorative and surgical perspectives. Surgically, implants are an obvious choice for edentulous areas, however challenges arise when replacement of questionable teeth with implants are contemplated. Periodontal literature provides insights when maintaining the dentition is possible. However, there are situations where the decision to replace teeth with implants is not very clear. The aim of the course is to explore the multiple facets of implant dentistry in order to achieve a broad perspective that will be valuable to implant treatment planning. Topics will include origins and science behind osseointegration, a basic review of surgical procedures typically used for augmentation and implant site preparation, implant success and failure, an understanding of periodontal prognosis of teeth in relation to implant prognosis, and surgical treatment planning of implants. The goal is to combine a broad understanding of the current science behind implants in order to develop a more concise treatment plan that helps navigate the difficult question of when to replace natural teeth with implants.

Topics to be covered:

• Periodontal diseases and their potential impact on implant prognosis
• Tooth prognosis versus implant prognosis
• Implants as foreign bodies
• Peri-implant disease
• Peri-implantitis in comparison to periodontitis lesions
• Prognostic evaluation of teeth in treatment planning for implants

Upon completion of the course participants should be able to know:

• Principals of osseointegration
• Principals of implant site preparation and augmentation
• The various theories behind peri-implant disease
• Differences between treatment planning implants for sites with and without teeth
• How to assign a concise prognosis for involved teeth
• How to select teeth for strategic extraction
• The indications and contraindications for placing dental implants in periodontally compromised cases
• Generally accepted modalities for treatment of peri-implantitis
