Part I: Lecture
This program for dentists and dental hygienists provides detailed and up-to-date information on new instrumentation and techniques that will enhance your ability to recognize and treat patients with moderate to advanced periodontitis.

The format includes lecture, discussion, and DVD presentations on the following topics:
- Rationale for root debridement
- Use of the periodontal endoscope
- New videotapes of periodontal endoscopy
- The influence of endoscopy on periodontal instrumentation
- Videotape comparing hand and ultrasonic instrumentation
- Solutions to common clinical problems with instrumentation
- Use of Gracey 15/16, Gracey 17/18, Extra Rigid Graceys, After Fives™ and Mini Fives™, Gracey Curvettes, diamond-coated files, furcation curets, instruments for implants and other new periodontal instruments
- Evaluation of ultrasonic units and tip designs, use of thin tipped ultrasonics
- Adaptation of curets and ultrasonic tips to root morphology
- Specific techniques for furcations, line angles, and deep narrow pockets
- Indications and techniques for use of local delivery antibiotics

Part II is a Limited Attendance Workshop.
Part II workshop teaches skills which build on concepts presented in the Part I (full-day) lecture course. Registrants for Part II must have attended Part I or another full day Advanced Periodontal Instrumentation lecture course by Anna Pattison within the past three years. Documented proof of attendance required.

Part II: Hands-On
This limited attendance laboratory course for dentists and dental hygienists is designed to enhance your periodontal instrumentation, enabling you to treat patients with greater skill and confidence. This intensive hands-on experience includes continuous TV demonstration by Anna Pattison, plus a team of experienced instructors, providing attentive individualized instruction throughout the day.

The course features:
- Root planing exercises and root morphology review on extracted teeth
- Keys to effective instrumentation technique
- Sextant by sextant hands-on instrumentation experience on typodonts with accurate root anatomy and periodontal defects
- Use of Gracey 15/16, Gracey 17/18, Extra Rigid Graceys, After Fives™ and Mini Fives™, Gracey Curvettes, diamond-coated files and furcation curets
- Use of extraoral, reinforced, crossarch and opposite arch fulcrams
- Innovative approaches for access to difficult problem areas such as furcations, line angles and deep, narrow pockets
- Instrument sharpening

Participants are asked to bring safety glasses and gloves. It is advisable for attendees to not wear white clothing. Typodonts, poles, and complete instrument kits will be provided for use only during the course.
