Travel & Learn Program
A Seminar At Sea

Cruise to Alaska Aboard ms Amsterdam:
Friday, July 4 - Friday, July 11, 2008
Glenn T. Clark, DDS, MS

Dr. Clark is Professor in the Division of Diagnostic Sciences, USC School of Dentistry. He is Director of the Center for Orofacial Pain and Oral Medicine and the Founding Graduate Program Director of the dual certificate residency program in Orofacial Pain and Medicine at USC. Dr. Clark published over 145 research articles, review papers, and chapters in textbooks. He is Past President of the Neuroscience Group of the International Association of Dental Research, the Southern California Association of Dental Research, and the Association of University Temporomandibular & Orofacial Pain Programs. He is currently a member of the prestigious Council on Scientific Affairs of the American Dental Association. He has been awarded membership as a Diplomate of the American Board of Orofacial Pain (since 1996) and was voted alumnus of the Year of the UCLA School of Dentistry (1990). Dr. Clark was awarded the Pierre Robin Award for Academic Excellence (2001) by the Academy of Dental Sleep Medicine and the fellowship in the American Academy for Oral Medicine (2004). In 2006, he was given a lifetime achievement award by the American Academy of Orofacial Pain.

Twelve Secrets About TMD and OFP That You Need To Know!

This course will review the twelve most important issues that a practicing dentist encounters while treating patients with acute TMJ disorders (TMD) and chronic orofacial pain (OFP). Each hour of lecture will focus on one of these issues including, among others, neurogenic, masticatory motor system and temporo-mandibular joint diseases. The course will also include state-of-the-art information on occlusion, pharmacology, physical medicine, sleep apnea, dental appliances and even botox and the ways these are used to help patients and alleviate TMD and OFP problems.

Upon Completion Participants Should Be Able To:

- Know the current best diagnostic methods for TMJ and OFP
- Understand how to diagnose derangements, arthritis, and myofascial pain disorders
- Know how to perform a physical examination on a patient with orofacial pain
- Compare and contrast current therapies that are used to treat TMJ and OFP problems
- Understand the risk/benefits of changing occlusion of patients with TMD
- Discuss the 50 most common medications used in an orofacial pain clinic

Alaska Cruise Travel & Learn Program - Registration Form

(For additional registration forms please xerox this page and send)

First Name __________________________ Last Name __________________________
Address ____________________________ __________________________
